

is projected between 2018 and 2025, extending out to 2030. Long-range projects include barracks, classrooms, other instructional buildings, facilities renovations, access control point (i.e., gates) upgrades, infrastructure modernization and other projects.

Three alternatives are analyzed in the Final EIS:

(1) Alternative 1—POM Centric. Under the POM Centric Alternative (Preferred Alternative), the majority of the proposed projects, such as barracks, classrooms and a dining facility, occur on the POM. Several new support facilities, such as the combined fire and police Emergency Services Center, are planned at the OMC. The Preferred Alternative preserves the centralized campus desired by the DLIFLC.

(2) Alternative 2—POM and OMC. Under the POM and OMC Alternative, new construction is proposed at both locations. Some of the new classrooms and housing facilities are planned at the OMC instead of the POM. New construction is limited to Army-owned land on the OMC and in close proximity to the existing military housing.

(3) No Action. Under the No-Action Alternative, the POM installation continues to operate under the existing but outdated 1983 Master Plan without modern or upgraded facilities. This Alternative provides the environmental baseline conditions for comparing the impacts associated with the other two alternatives.

The Final EIS addresses impacts from implementation of the Proposed Action to 16 resource areas. Impacts range from beneficial to no effect to significant. There could be significant impacts to cultural resources from the long-range projects, which are analyzed in the document at a programmatic level. The POM Installation has conducted and will engage in appropriate consultation under the National Historic Preservation Act. As project planning and design progresses, there could be requirements for supplemental environmental documentation and regulatory compliance, including adoption of mitigation measures. There are less than significant impacts to other resources. The EIS identifies mitigation to lessen the adverse impacts. Several changes to the proposed projects and to the Final EIS result from public and agency comments. These changes lessen the impacts on natural resources. Facilities are also planned to Leadership in Energy and Environmental Design standards to conserve resources.

The U.S. Army plans to issue a Record of Decision following a 30-day waiting period.

Copies of the Final EIS are available at public libraries in the cities of Monterey, Pacific Grove and Seaside, and the Chamberlain Library on the OMC. An electronic version of the Final EIS can be viewed or downloaded from the POM Web site at [http://www.monterey.army.mil/DPW/env\\_assessment.html](http://www.monterey.army.mil/DPW/env_assessment.html).
