SUPPLEMENTARY INFORMATION: The Department of the Interior, the Utah Reclamation Mitigation and Conservation Commission, and the Central Utah Water Conservancy District have completed evaluating the impacts of the proposed East Hobbie Creek Restoration Project. The Final Environmental Assessment has been completed in conjunction with the June Sucker Recovery Implementation Program, and provides an analysis of the anticipated environmental effects of a proposed restoration effort on a portion of lower Hobbie Creek, near Springville, Utah. This restoration effort is intended to facilitate the recovery of the June sucker, a federally listed endangered species, through improvement of spawning habitat and maintenance of stream flow. The effort analyzed included the potential restoration of approximately 2 miles of stream channel, modification or removal of several existing barriers to fish passage, use of the Utah Lake System Hobbie Creek Valve Station for supplemental stream-flow releases, and enhancement of the existing water supply.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program.

Conservation Strategy for the Northern Continental Divide Ecosystem of the grizzly bear (*Ursus arctos horribilis*) demonstrates the adequacy of regulatory mechanisms that will remain in place post-delisting to assure the health of this grizzly population. The Conservation Strategy describes the management and monitoring direction to maintain a recovered grizzly bear population in the NCDE and documents the commitment of signatory agencies to the Memorandum of Understanding implementing the Strategy to continue to manage the grizzly and its habitat as per the specifics in the Strategy document. The NCDE Conservation Strategy is the post-delisting management plan for this population and its habitat.

SUPPLEMENTARY INFORMATION: This document provides notice that the BLM Owyhee Field Office in Marsing, Idaho, has prepared a Draft EIS to address grazing permit renewal requests in the Jump Creek, Succor Creek, and Cow Creek areas, and announces the beginning of the 45-day public comment period. The area covered by the permit renewal requests is located in Owyhee County, Idaho, and encompasses approximately 120,000 acres of public land. In addition to livestock grazing, a variety of other multiple uses exist within this area, including: Year-long recreation activities, particularly hiking, boating, fishing, hunting, and off-road vehicle use; wild horse management; potential wind energy development and electrical transmission line development. The Owyhee Field Office will consult with the Shoshone-Paiute Tribes and other parties, as applicable, on this action during regular consultation proceedings and briefings. Federal, state, and local agencies, along with other stakeholders that may be interested or affected by the BLM's decision on this project are invited to comment as well.

The purpose of the action in the Draft EIS is to provide for livestock grazing opportunities on public lands using existing infrastructure where such grazing is consistent with meeting management objectives, including the Idaho Standards for Rangeland Health and Guidelines for Livestock Grazing Management (1997).

The need is established by the Taylor Grazing Act (TGA), the Federal Land Policy and Management Act (FLPMA), and the Owyhee Resource Management Plan (ORMP) (1999), which require that the BLM respond to applications to renew or for new permits to graze livestock on public land. In detail, analysis of the actions identified in the applications for grazing permit renewals and the alternative actions is needed because:
