

ADDRESSES: Submit comments concerning the proposed directives through one of the following methods:

1. *Public participation portal:* <https://cara.ecosystem-management.org/Public/CommentInput?Project=30641>. Comments may also be provided through the Federal rulemaking portal: <http://www.regulations.gov>.

2. *Facsimile:* Fax to: 503.224.1851. Please identify your comments by including “RIN 0596–AD06” or “planning directives” on the cover sheet or the first page.

3. *U.S. Postal Service:* The mailing address is: USDA Forest Service Planning Directives Comments, P.O. Box 40088, Portland, OR 97240.

All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The Agency cannot confirm receipt of comments. Individual wishing to inspect comments should call Jody Sutton at 801.517.1020 to schedule an appointment.

FOR FURTHER INFORMATION CONTACT: Annie Eberhart Goode, (202) 205–1056, Planning Specialist, Ecosystem Management Coordination.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–839 between 8:00 a.m. and 8:00 p.m. Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The Forest Service has proposed Land Management Planning Directives for inclusion in the Forest Service Handbook (FSH 1909.12) and Manual (FSM 1920) establishing procedures and responsibilities for implementing the National Forest System (NFS) land management planning regulation published in the **Federal Register** on April 9, 2012 (77 FR 21162) and set out at 36 CFR part 219. To provide the public the opportunity to review and comment on these proposed directives, the Agency initiated a 60-day comment period which closed on April 29, 2013. The Agency has decided to reopen the comment period for an additional 15 days to provide an opportunity to gather additional public input to inform the final Land Management Planning Directives.

Dated: May 2, 2013.

Thomas L. Tidwell,
Chief, U.S. Forest Service.

Magnesium Metal From the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2011–2012

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On January 9, 2013, the Department of Commerce (the “Department”) published the *Preliminary Results*¹ of the 2011–2012 administrative review of the antidumping duty order on magnesium metal from the People's Republic of China (“PRC”), in which it found that the one respondent company, Tianjin Magnesium International, Co., Ltd (“TMI”), had no shipments during the period of review (“POR”). The POR is April 1, 2011, through March 31, 2012. We gave interested parties an opportunity to comment on the *Preliminary Results*, but none were received. Therefore, we continue to find that TMI had no reviewable transactions of subject merchandise during the POR.

DATES: *Effective Date:* May 9, 2013.

FOR FURTHER INFORMATION CONTACT: Laurel LaCivita, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, Department of Commerce, 14th Street and Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4243.

SUPPLEMENTARY INFORMATION:

Scope of the Order

The product covered by this antidumping duty order is magnesium metal from the PRC, which includes primary and secondary alloy magnesium metal, regardless of chemistry, raw material source, form, shape, or size. The merchandise subject to this order is classifiable under items 8104.19.00, and 8104.30.00 of the Harmonized Tariff Schedule of the United States (“HTSUS”). Although the HTSUS number is provided for convenience and customs purposes, the written product description, available in *Notice of Antidumping Duty Order: Magnesium Metal From the People's Republic of China*, 70 FR 19928 (April 15, 2005), remains dispositive.

¹ See *Magnesium Metal from the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review; 2011–2012*, 78 FR 1834 (January 9, 2013) (“*Preliminary Results*”).

Final Finding of No Shipments

As in the *Preliminary Results*, because TMI submitted a timely no-shipment certification and U.S. Customs and Border Protection (“CBP”) data indicated that there were no reviewable transactions for this company during the POR, we continue to find that TMI had no reviewable transactions of subject merchandise.²

Assessment

Upon issuance of the final results, the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of review. The Department recently announced a refinement to its assessment practice in non-market economy cases.³ Pursuant to this refinement in practice, for entries that were not reported in the U.S. sales databases submitted by companies individually examined during this review, the Department will instruct CBP to liquidate such entries at the PRC-wide rate. In addition, if the Department determines that an exporter under review had no shipments of the subject merchandise, any suspended entries that entered under that exporter's case number (*i.e.*, at that exporter's rate) will be liquidated at the PRC-wide rate.⁴

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise from the PRC entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Tariff Act of 1930, as amended (the “Act”): (1) For previously investigated or reviewed PRC and non-PRC exporters not listed above that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (2) for all PRC exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be that for the PRC-wide entity; and (3) for all non-PRC exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the PRC

² See *Preliminary Results*.

³ See *Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties*, 76 FR 65694 (October 24, 2011).

⁴ See *id.*

exporter that supplied that non-PRC exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under section 351.402(f) of the Department's regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in the Department's presumption that reimbursement of antidumping duties has occurred and the subsequent assessment of doubled antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with section 351.305 of the Department's regulations, which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing these results and this notice in accordance with sections 751(a)(1) and 777(i) of the Act.

Dated: April 30, 2013.

Paul Piquado,

Assistant Secretary for Import Administration.

Application(s) for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, as amended by Pub. L. 106-36; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be postmarked on or before May 29, 2013. Address written comments to Statutory Import Programs Staff, Room 3720, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. at the U.S. Department of Commerce in Room 3720.

Docket Number: 13-008. Applicant: University of Hawaii at Manoa, 2800 Woodlawn Drive, Suite 198, Honolulu, HI 96822. Instrument: Telescope. Manufacturer: Advanced Mechanical and Optical Systems, Belgium. Intended Use: The instrument will be used in conjunction with the Panoramic Survey Telescope & Rapid Response System (Pan-STARRS), to discover and characterize Earth-approaching objects, both asteroids and comets that might pose a danger to the Earth, as well as a wide range of other research areas of astronomy. Critical performance characteristics include the ability to detect objects much fainter than has hitherto been possible with sufficient resolution to measure both the position and brightness level to the required precision, that the instrument be sufficiently robust and reliable that it can carry out continuous observations without direct human supervision under both benign and harsh meteorological observing conditions, and servicing and maintenance that can be performed as quickly as possible to minimize system down time. The heat released by the electrical/electronic components cannot have an impact on the system point spread function that exceeds a combined total of 0.1 arcseconds. Other key features that were not proposed by domestic vendors include the use of 36 actuators to control the shape of the telescope's primary mirror, active cooling of the mechanical structure containing the primary mirror, design and performance analysis of the structures holding the telescope secondary mirror in position, the mechanical design and performance analysis of the telescope "truss", active cooling of the motors that move the telescope, additional performance margin of the telescope motors to provide additional power and torque in the presence of high motor loads, and the serviceability of several key telescope components that traditionally are both prone to failure and hard to get at, as well as allowing the removal of extremely difficult components. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by

Commissioner of Customs: March 4, 2013.

Docket Number: 13-009. Applicant: Max Planck Florida Institute for Neuroscience, 1 Max Planck Way, Jupiter, FL 33458. Instrument: Serial Block face microtome. Manufacturer: Gatan, United Kingdom. Intended Use: The instrument will be used to analyze neural circuits employing principally bioimaging, electrophysiology and genetic approaches to understand visual perception and the organization of the visual cortex, synapse physiology and mechanisms of synaptic signaling and computation, the molecular mechanisms of synaptic function, the cellular organization of cortical circuit function, and the digital anatomy of the brain. To precisely identify synaptic contacts between neurons and distinguish between overlapping processes or actual synaptic contacts requires high resolution imaging with an Electron Microscope (EM) including 3D reconstruction of each process and its surroundings. Furthermore, relatively large volumes of brain should be imaged to cover the entire region and profile even for a single neuron. The instrument allows automatic imaging of multiple regions of interest on the sample and stage mounting for large fields of view, and a cutting thickness down to 15 nm. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: March 11, 2013.

Docket Number: 13-012. Applicant: New Mexico Institute of Mining and Technology, 801 Leroy Place, Socorro, NM 87801. Instrument: Delay-Line (DL) Trolley. Manufacturer: University of Cambridge/Cavendish Laboratory, United Kingdom. Intended Use: The instrument will be used to make extremely high-resolution images of a diverse range of astronomical objects. The images made using the instrument will allow a variety of astrophysical processes in the target objects to be investigated, such as protostellar accretion, disk clearing as evidence for planet formation, jet, outflows and magnetically channeled accretion, and the detection of sub-stellar companions. In order to obtain interference fringes, the path lengths traveled by the light from celestial objects via the telescopes to the point where interference takes place must be equalized to a few microns. The extra path (delay) that must be inserted varies continuously as the Earth rotates, and depends on the location of the target in the sky. The instrument is used within the
