SUPPLEMENTARY INFORMATION:

I. Background

The information collection is necessary for the U.S. Department of Labor's (DOL's) award of National Emergency Grants (NEGs) which are discretionary grants intended to temporarily expand the service capacity at the state and local area levels by providing funding assistance in response to significant dislocation events for workforce development and employment services and other adjustment assistance for dislocated workers and other eligible individuals as defined in sections 101, 134 and 173 of the Workforce Investment Act (WIA) (Pub. L. 105-220); sections 113, 114 and 203 of the Trade Adjustment Assistance (TAA) Reform Act of 2002 (Pub. L. 107-210), as amended; and 20 CFR 671.140. Applications are accepted on an ongoing basis as the need for funds arises at the state and local levels. The provisions of WIA and the Regulations define four NEG project types:

- *Regular*, which encompasses plant closures, mass layoffs, and multiple layoffs in a single community.
- *Disaster*, which includes all eligible Federal Emergency Management Agency (FEMA)-declared natural and manmade disaster events.
- *TAA-WIA Dual Enrollment*, which provides supplemental funding to ensure that a full range of services is available to individuals eligible under the TAA program provisions of the TAA Reform Act of 2002, as amended.
- *TAA Health Insurance Coverage Assistance*, which provides specialized health coverage, support services, and income assistance to targeted individuals defined in the TAA program provisions of the TAA Reform Act of 2002, as amended.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-025 and 52-026; NRC-2008-0252]

Vogtle Electric Generating Station, Units 3 and 4; Southern Nuclear Operating Company; Change to Information in Tier 1, Table 3.3-1

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and Combined License Amendment: Issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an

exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and License Amendment No. 6 to Combined Licenses (COL), NPF-91 and NPF-92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and the City of Dalton, Georgia (the licensee); for construction and operation of the Vogtle Electric Generating Plant (VEGP), Units 3 and 4, located in Burke County, Georgia. The amendment changes requested improve the clarity and accuracy of the Tier 1 information located in Table 3.3-1, "Definition of Wall Thicknesses for Nuclear Island Buildings, Turbine Buildings, and Annex Building," which describes wall and floor thicknesses in the plant. The granting of the exemption allows the changes asked for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is issuing an exemption from Paragraph B of Section III, "Scope and Contents," of Appendix D, "Design Certification Rule for the AP1000," to Part 52 of Title 10 of the *Code of Federal Regulations* (10 CFR) and License Amendment No. 6 to COLs, NPF-91 and NPF-92, issued to the licensee. The exemption is required by Paragraph A.4 of Section VIII, "Processes for Changes and Departures," Appendix D to 10 CFR part 52 to allow the licensee to depart from Tier 1 information. The licensee sought to change the Tier 1 information located in Table 3.3-1 of its Updated Final Safety Analysis Report (UFSAR). These changes sought to improve the clarity and accuracy of the table so that it could be more easily inspected during Inspections, Tests, Analyses, and Acceptance Criteria (ITAAC) closure.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in 10 CFR 50.12, 10 CFR 52.7, and Section VIII.A.4. of Appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML13074A178.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to the licensee for Vogtle Units 3 and 4 (COLs NPF-91 and NPF-92). These documents can be found in ADAMS under Accession Nos. ML13112A231 and ML13112A242. The exemption is reproduced (with the exception of
