Type of Request: Notice of an extension of a currently approved information collection.

Respondent Obligation: Required to obtain or retain benefits.

Abstract

The Water Resources Research Act of 1984, as amended (42 U.S.C. 10301 et seq.), authorizes a water resources research institute or center in each of the 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, the Federated States of Micronesia, the Commonwealth of the Northern Mariana Islands, and American Samoa. There are currently 54 such institutes, one in each state, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and Guam. The institute in Guam is a regional institute serving Guam, the Federated States of Micronesia, and the Commonwealth of the Northern Mariana Islands. Each of the 54 institutes submits an annual application for an allotment grant and provides an annual report on its activities under the grant. The State Water Resources Research Institute Program issues an annual call for applications from the institutes to support plans to promote research, training, information dissemination, and other activities meeting the needs of the States and Nation. The program also encourages regional cooperation among institutes in research into areas of water management, development, and conservation that have a regional or national character.

The U.S. Geological Survey has been designated as the administrator of the provisions of the Act.

Frequency of Collection: Annually.

Estimated Number and Description of

Respondents: We expect to receive 54 applications and 54 annual reports.

Estimated Annual Responses: 108.

Estimated Annual Burden Hours: 8,640 (including 100 hours per application and 60 hours per report).

Estimated Reporting and Recordkeeping “Non-Hour Cost” Burden: There is no non-hour cost burden associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, et seq.) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

Comments: To comply with the public consultation process, on April 18, 2013, we published a **Federal Register** notice (78 FR 2422) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day public comment period, which ended June 19, 2013. We did not receive any comments in response to that notice. We again invite comments concerning this information collection on: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) how to enhance the quality, usefulness, and clarity of the information to be collected; and (d) how to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.
