Draft Environmental Impact Statement for Tuolumne Wild and Scenic River Comprehensive Management Plan, Yosemite National Park, Madera, Mariposa, Mono and Tuolumne Counties, California

AGENCY: National Park Service, Interior. **ACTION:** Notice of availability.

SUMMARY: Pursuant to § 102(2) (C) of the National Environmental Policy Act of 1969 (Pub. L. 91-190, as amended), and the Council on Environmental Quality Regulations (40 CFR part 1500-1508), the National Park Service has prepared a Draft Environmental Impact Statement (DEIS) for the proposed Tuolumne Wild and Scenic River Comprehensive Management Plan (TRPCMP). The **TRPCMP/DEIS** addresses requirements of the Wild and Scenic Rivers Act (Pub. L. 90-542, as amended) (WSRA), and will provide long-term guidance for management of the 54 miles of the Tuolumne River that flows through Yosemite National Park. The DEIS evaluates potential environmental consequences of implementing a range of alternatives, including a no-action (continue with current management) alternative and five action alternatives. Both the agency-preferred and environmentally preferred alternatives are identified.

The purpose of the TRPCMP is to guide the park in protecting the river's free-flowing character and the values that make it worthy of designation by (1) reviewing and updating river corridor boundaries and segment classifications, (2) prescribing a process for the protection of the river's free-flowing condition, (3) identifying and documenting the condition of the river's outstandingly remarkable values, (4) establishing management objectives for river values and a monitoring program for ensuring the objectives are met, (5) identifying management actions needed to protect and enhance river values, and (6) defining visitor use and user capacity for the river corridor. Portions of the 1980 Yosemite General Management Plan (GMP) addressing management inside the Tuolumne Wild and Scenic River corridor also will be updated; specific GMP amendments are outlined in the DEIS.

Proposal and Alternatives: Based on a thorough examination of the river's baseline conditions, the TRPCMP/DEIS presents a multi-faceted approach to river management and stewardship. Because of the WSRA mandate to "protect and enhance" river values, most of the plan's contents are common to all the action alternatives, including (1) all WSRA management elements (boundaries, classifications, §7 determination process), (2) an ecological restoration program and other management actions, (3) a monitoring program, and (3) a user capacity management program. As discussed in detail in the DEIS, Alternative 5 is deemed to be the environmentally preferred course of action.

Since the conservation planning and environmental impact analysis process began in 2005, the TRPCMP/DEIS has been methodically developed by park subject-matter experts, with attention to information provided by culturallyassociated American Indian tribes, gateway communities, nonprofit organizations, and interested members of the public. Throughout the early conservation planning and environmental impact analysis effort, information was sought at over 127 public meetings, workshops, and presentations. At these events, the public was invited to share ideas that could be used in the development of a range of alternatives that would achieve NPS goals, while ensuring accessibility, public safety, resource protection, and protection and enhancement of river values.

As noted above, a no-action alternative and five action alternatives for managing the Tuolumne Wild and Scenic River are identified and analyzed. The five action alternatives represent the primary themes expressed during public scoping. Potential impacts are analyzed and appropriate mitigation measures are assessed for each alternative. Per WSRA direction, all of the action alternatives would protect and enhance the values for which the Tuolumne was designated, including its free-flowing condition, excellent water quality, and outstandingly remarkable values. In addition, all action alternatives would preserve and sustain
