The proposed danger zone is necessary to protect the public from hazards associated with small arms fire operations.

#### Procedural Requirements

##### *a. Review Under Executive Order 12866*

This proposed rule is issued with respect to a military function of the Department of Defense and the

provisions of Executive Order 12866 do not apply.

##### *b. Review Under the Regulatory Flexibility Act*

This proposed rule has been reviewed under the Regulatory Flexibility Act (Pub. L. 96–354) which requires the preparation of a regulatory flexibility analysis for any regulation that will have a significant economic impact on a substantial number of small entities (i.e., small businesses and small governments). Unless information is obtained to the contrary during the public notice comment period, the Corps expects that the proposed danger zone would have practically no economic impact on the public, no anticipated navigational hazard, or interference with existing waterway traffic. This proposed rule, if adopted, will have no significant economic impact on small entities.

##### *c. Review Under the National Environmental Policy Act*

Due to the administrative nature of this action and because there is no intended change in the use of the area, the Corps expects that this regulation, if adopted, will not have a significant impact to the quality of the human environment and, therefore, preparation of an environmental impact statement will not be required. An environmental assessment will be prepared after the public notice period is closed and all comments have been received and considered.

##### *d. Unfunded Mandates Act*

This proposed rule does not impose an enforceable duty among the private sector and, therefore, it is not a Federal private sector mandate and it is not subject to the requirements of either Section 202 or Section 205 of the Unfunded Mandates Act. We have also found under Section 203 of the Act, that small governments will not be significantly and uniquely affected by this rulemaking.
