authority of Clean Air Act sections 203 and 208, give authority for the collection of this information. The information is used by program personnel to ensure that all Federal emissions requirements are met and by State regulatory agencies, businesses and individuals to verify whether vehicles are in compliance. Any information submitted to the Agency for which a claim of confidentiality is made is safeguarded according to policies set forth in the Code of Federal Regulations, title 40, chapter 1, part 2, subpart B—Confidentiality of Business Information, and the public is not permitted access to information containing personal or organizational identifiers.

Frequency of response: Occasionally.

Total estimated burden: 8,040 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$460,412 (per year), which includes \$141,493 annualized capital and operation & maintenance costs.

Changes in Estimates: There is a decrease of 1,310 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a decrease in the number of responses expected.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A and any changes, or additions to the Provisions specified at 40 CFR part 60, subparts M, P, Q, R, S and Z. Owners or operators of the affected facilities must make an initial notification report, performance tests, periodic reports, and maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of secondary brass and bronze production facilities, primary copper smelters, primary zinc smelters, primary lead smelters, primary aluminum reduction plants, and ferroalloy production facilities.

Respondent’s obligation to respond: Mandatory (40 CFR part 60, subparts M, P, Q, R, S and Z).

Estimated number of respondents: 19 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 4,961 hours (per year). “Burden” is defined at 5 CFR 1320.3(b).

Total estimated cost: \$612,224 (per year), includes \$127,100 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent burden from the most recently approved ICR. This increase is not due to any program changes. The increase is due to a correction in respondent burden activity associated with NSPS Subpart S. The previous ICR did not include the time required to prepare semiannual reports for the respondents. This correction results in an increase in respondent burden hours, costs, and the

total number of responses. There is also an increase in the respondent labor costs due to an update in labor rates. Further, there is an overall decrease in O&M costs due to an update in the number of sources. In this ICR, we estimate that two ferroalloy facilities are subject to Subpart Z and one primary lead facility is subject to subpart R; however, the affected sintering unit and blast furnace at this primary lead facility will be shutdown and will no longer have burden associated with the standards.
