

any new requirements for COL applicants or holders under Part 52, or for licensees of existing operating units licensed under Part 50. Rather, they contain additional guidance and clarification on compliance with 10 CFR 50.34(h) and 10 CFR 52.79(a)(41), and may be used by operating license and COL applicants, respectively, in the preparation of their applications. As explained in the applicability section of each ISG, the ISGs do not apply to holders of nuclear power reactor operating licenses under 10 CFR Part 50 or combined licenses under 10 CFR Part 52 as of the effective date of these ISGs and, for ISG-014, the effective date of revision of SRP Section 2.4.13, and for applicants for nuclear power reactor operating licenses under 10 CFR Part 50 or combined licenses under 10 CFR Part 52 that have committed, in applications docketed with the NRC as of the effective date of this ISG and, for ISG-014, the effective date of revision of SRP Section 2.4.13, to specific guidance in assessing the radiological consequences of a postulated failure of a tank containing radioactive materials.

Congressional Review Act

Each of these ISGs is a rule as designated in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found either one to be a major rule as designated in the Congressional Review Act.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review, Request for Comments

Summary: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Railroad Retirement Board (RRB) is forwarding an Information Collection Request (ICR) to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget (OMB). Our ICR describes the information we seek to collect from the public. Review and approval by OIRA ensures that we impose appropriate paperwork burdens.

The RRB invites comments on the proposed collection of information to determine (1) the practical utility of the collection; (2) the accuracy of the estimated burden of the collection; (3) ways to enhance the quality, utility, and clarity of the information that is the

subject of collection; and (4) ways to minimize the burden of collections on respondents, including the use of automated collection techniques or other forms of information technology. Comments to the RRB or OIRA must contain the OMB control number of the ICR. For proper consideration of your comments, it is best if the RRB and OIRA receive them within 30 days of the publication date.

Under Section 9 of the Railroad Retirement Act (RRA), and Section 6 of the Railroad Unemployment Insurance Act (RUIA), railroad employers are required to submit reports of employee service and compensation to the RRB as needed for administering the RRA and RUIA. To pay benefits due on a deceased employee's earnings records or determine entitlement to, and amount of annuity applied for, it is necessary at times to obtain from railroad employers current (lag) service and compensation not yet reported to the RRB through the annual reporting process. The reporting requirements are specified in 20 CFR 209.6 and 209.7.

The RRB currently utilizes Form G-88A.1, Notice of Retirement and Verification of Date Last Worked, Form G-88A.2, Notice of Retirement and Request for Service Needed for Eligibility, and Form AA-12, Notice of Death and Compensation, to obtain the required lag service and related information from railroad employers. Form G-88A.1 is a computer-generated listing sent by the RRB to railroad employers and used for the specific

purpose of verifying information previously provided to the RRB regarding the date last worked by an employee. If the information is correct, the employer need not reply. If the information is incorrect, the employer is asked to provide corrected information. Form G-88A.2 is used by the RRB to secure lag service and compensation information when it is needed to determine benefit eligibility. Form AA-12 obtains a report of lag service and compensation from the last railroad employer of a deceased employee. This report covers the lag period between the date of the latest record of employment processed by the RRB and the date an employee last worked, the date of death or the date the employee may have been entitled to benefits under the Social Security Act. The information is used by the RRB to determine benefits due on the deceased employee's earnings record.

In addition, 20 CFR 209.12(b) requires all railroad employers to furnish the RRB with the home addresses of all employees hired within the last year (new-hires). Form BA-6a, *Form BA-6 Address Report*, is used by the RRB to obtain home address information of employees from railroad employers who do not have the home address information computerized and who submit the information in a paper format. The form also serves as an instruction sheet to railroad employers who can submit the information electronically by magnetic tape

cartridge, CD-ROM, PC diskette, secure Email, or via ERS.

Completion of the forms is mandatory. Multiple responses may be filed by respondent.

Previous Requests for Comments: The RRB has already published the initial 60-day notice (77 FR 51833 on August 27, 2012) required by 44 U.S.C. 3506(c)(2). That request elicited no comments.
