

range of the Jemez Mountain salamander that are in critical condition and require immediate repair. This approximately 17.5-mile-long portion of pipeline lies between the village of Cuba, New Mexico, and the western boundary of the Valles Caldera National Preserve within the Santa Fe National Forest. Emergency repairs are necessary to ensure that natural gas pressure may be restored to levels necessary to supply northern New Mexico with adequate fuel for home heating before any cold weather in early November. These emergency repairs to the pipeline have been analyzed and authorized under an emergency consultation between the Cuba Ranger District, Santa Fe National Forest and the Service's New Mexico Ecological Services Field Office (Consultation # 02ENNM00–2013–FE–0110). We, the U.S. Fish and Wildlife Service (Service) have, under an Endangered Species Act (16 U.S.C. 1531 et seq.) permit, authorized the following researchers to survey for and move Jemez Mountain salamanders out of harm's way during pipeline repairs:

SUPPLEMENTARY INFORMATION:

OMB Control Number: 1010-0114.

Title: 30 CFR Part 550, Subpart A, General, and Subpart K, Oil and Gas Production Requirements.

Forms: BOEM-0127, BOEM-0140, BOEM-1123, BOEM-1832.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to prescribe rules and regulations to administer leasing of the OCS. Such rules and regulations will apply to all operations conducted under a lease. Operations in the OCS must preserve, protect, and develop oil and natural gas resources in a manner that is consistent with the need to make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resource development with protection of human, marine, and coastal environments; ensure the public a fair and equitable return on the resources of the OCS; and preserve and maintain free enterprise competition. Section 1332(6) states that "operations in the [O]uter Continental Shelf should be conducted in a safe manner by well trained personnel using technology, precautions, and techniques sufficient to prevent or minimize . . . loss of well control . . . physical obstructions to users of the waters or subsoil and seabed, or other occurrences which may cause damage to the environment or to property or endanger life or health."

The Independent Offices Appropriations Act (31 U.S.C. 9701), the Omnibus Appropriations Bill (Pub. L. 104-133, 110 Stat. 1321, April 26, 1996), and Office of Management and Budget (OMB) Circular A-25 authorize Federal agencies to recover the full cost of services that confer special benefits. Under the Department of the Interior's (DOI) implementing policy, the Bureau of Ocean Energy Management (BOEM) is required to charge fees for services that provide special benefits or privileges to an identifiable non-Federal recipient above and beyond those that accrue to the public.

This ICR covers 30 CFR 550, Subpart A, General, and Subpart K, Oil and Gas Production Requirements, which deal with regulatory requirements of oil, gas, and sulphur operations on the OCS. This request also covers the related Notices to Lessees and Operators (NTLs)
