SUPPLEMENTARY INFORMATION:

Introduction

Section 302(g)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.*, states that each Council shall establish such advisory panels as are necessary or appropriate to assist in carrying out its functions under the Act. The Magnuson-Stevens Act provides that this section is applicable to HMS Management by the Secretary as well as by Councils. As such, NMFS has established the SEDAR Pool under this section. The SEDAR Pool currently consists of 26 individuals who can be selected to review data and advise NMFS regarding scientific information, including but not limited to data and models, used in stock assessments for oceanic sharks in the Atlantic Ocean, Gulf of Mexico, and Caribbean Sea. While the SEDAR Pool was created specifically for Atlantic oceanic sharks, it may be expanded to include other HMS, as needed.

The primary purpose of the individuals in the SEDAR Pool is to review, at SEDAR workshops, the scientific information (including but not limited to data and models) used in stock assessments that are used to advise NMFS about the conservation and management of the Atlantic HMS, specifically but not limited to, Atlantic sharks. Individuals in the SEDAR Pool, if selected, may participate in the various data, assessment, and review workshops during the SEDAR process of any HMS stock assessment. In order to ensure that the peer review is unbiased, individuals who participated in a data and/or assessment workshop for a particular stock assessment will not be allowed to serve as reviewers for the same stock assessment. However, these individuals may be asked to attend the review workshop to answer specific

questions from the reviewers concerning the data and/or assessment workshops. Members of the SEDAR Pool may serve as members of other APs concurrent with, or following, their service on the SEDAR Pool.

Procedures and Guidelines

A. Participants

The SEDAR Pool is comprised of individuals representing the commercial and recreational fishing communities for Atlantic sharks, the environmental community active in the conservation and management of Atlantic sharks, and the academic community that have relevant expertise either with sharks or shark-like species and/or stock assessment methodologies for marine fish species. Members of the SEDAR Pool must have demonstrated experience in the fisheries, related industries, research, teaching, writing, conservation, or management of marine organisms. The distribution of representation among the interested parties is not defined or limited.

Additional members of the SEDAR Pool may also include representatives from the five Atlantic Regional Fishery Management Councils, the 18 states in the Atlantic and Gulf of Mexico, both the U.S. Virgin Islands and Puerto Rico, and the interstate commissions: the Atlantic States Marine Fisheries Commission and the Gulf States Marine Fisheries Commission.

If NMFS requires additional members to ensure a diverse pool of individuals for data or assessment workshops, NMFS may request individuals to become members of the SEDAR Pool outside of the annual nomination period.

Panel members serve at the discretion of the Secretary. Not all members will be selected to attend each SEDAR workshop. Rather, NMFS will invite certain members to participate at specific stock assessment workshops dependent on their ability to participate, discuss, and recommend scientific decisions regarding the species being assessed. If an invited SEDAR Pool member is unable to attend the workshop, the member may send a designee who may represent them and participate in the activities of the workshop. In order to ensure the designee meets the requirements of participating in the data and/or assessment workshop, the designee must receive written approval of the Director of the Office of Sustainable Fisheries at least six weeks in advance of the beginning of the relevant data and/or assessment workshop. Written notification must include the name,
