Endangered Species; Marine Mammals; Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of applications for permit.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications to conduct certain activities with endangered species, marine mammals, or both. With some exceptions, the Endangered Species Act (ESA) and Marine Mammal Protection Act (MMPA) prohibits activities with listed species unless Federal authorization is acquired that allows such activities.

DATES: We must receive comments or requests for documents on or before January 8, 2014. We must receive requests for marine mammal permit public hearings, in writing, at the address shown in the **ADDRESSES** section by January 8, 2014.

ADDRESSES: Brenda Tapia, Division of Management Authority, U.S. Fish and Wildlife Service, 4401 North Fairfax Drive, Room 212, Arlington, VA 22203; fax (703) 358-2280; or email DMAFR@fws.gov.

FOR FURTHER INFORMATION CONTACT: Brenda Tapia, (703) 358-2104 (telephone); (703) 358-2280 (fax); DMAFR@fws.gov (email).

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

A. How do I request copies of applications or comment on submitted applications?

Send your request for copies of applications or comments and materials concerning any of the applications to the contact listed under **ADDRESSES**. Please include the **Federal Register** notice publication date, the PRT-number, and the name of the applicant in your request or submission. We will not consider requests or comments sent to an email or address not listed under **ADDRESSES**. If you provide an email address in your request for copies of applications, we will attempt to respond to your request electronically.

Please make your requests or comments as specific as possible. Please confine your comments to issues for which we seek comments in this notice, and explain the basis for your

comments. Include sufficient information with your comments to allow us to authenticate any scientific or commercial data you include.

The comments and recommendations that will be most useful and likely to influence agency decisions are: (1) Those supported by quantitative information or studies; and (2) Those that include citations to, and analyses of, the applicable laws and regulations. We will not consider or include in our administrative record comments we receive after the close of the comment period (see **DATES**) or comments delivered to an address other than those listed above (see **ADDRESSES**).

B. May I review comments submitted by others?

Comments, including names and street addresses of respondents, will be available for public review at the street address listed under **ADDRESSES**. The public may review documents and other information applicants have sent in support of the application unless our allowing viewing would violate the Privacy Act or Freedom of Information Act. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

II. Background

To help us carry out our conservation responsibilities for affected species, and in consideration of section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), along with Executive Order 13576, “Delivering an Efficient, Effective, and Accountable Government,” and the President’s Memorandum for the Heads of Executive Departments and Agencies of January 21, 2009—Transparency and Open Government (74 FR 4685; January 26, 2009), which call on all Federal agencies to promote openness and transparency in Government by disclosing information to the public, we invite public comment on these permit applications before final action is taken. Under the MMPA, you may request a hearing on any MMPA application received. If you request a hearing, give specific reasons why a hearing would be appropriate. The holding of such a

hearing is at the discretion of the Service Director.

Applicant: BBC Television, Bristol, England; PRT-14359B

On November 22, 2013, we published a **Federal Register** notice inviting the public to comment on an application for a permit to photograph polar bears (*Ursus maritimus*) (78 FR 70067). We cited the incorrect PRT number (PRT-05202B); the correct PRT number is above.

Concurrent with publishing this notice in the **Federal Register**, we are forwarding copies of the above applications to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Proposal To Withdraw Spatial Data Transfer Standard, Parts 1-7

AGENCY: U.S. Geological Survey, Department of the Interior.

ACTION: Notice of request for comments on proposal to withdraw Spatial Data Transfer Standard, Parts 1-7.

SUMMARY: The Federal Geographic Data Committee (FGDC) proposes to withdraw the Spatial Data Transfer Standard (SDTS), Parts 1-7, <http://www.fgdc.gov/standards/projects/FGDC-standards-projects/SDTS/index.html>, as an FGDC-endorsed standard. FGDC maintenance authority agencies were asked to review the relevance of the SDTS, and they responded that the SDTS is no longer used by their agencies.

The SDTS had provided a common mechanism for transferring digital geospatial data among different systems and for sharing and integrating data from many diverse sources. For more information about the SDTS, refer to the **SUPPLEMENTARY INFORMATION** section.

The FGDC seeks comment from any organization that continues to provide data in the SDTS format and would prefer to retain the SDTS as an FGDC-

endorsed standard. Alternatively, it seeks comment from any organization that supports withdrawal of the SDTS Parts 1-7 as an FGDC-endorsed standard. FGDC Standards Directive #9, Maintenance, <http://www.fgdc.gov/standards/process/standards-directives/directive-09>, requires a 90-day public comment period for proposals to withdraw FGDC-endorsed standards.

DATES: Comments on the FGDC proposal to withdraw the Spatial Data Transfer Standard, Parts 1-7, shall be submitted to Ms. Julie Binder Maitra, FGDC Standards Coordinator, jmaitra@fgdc.gov, by Friday, February 21, 2014.

FOR FURTHER INFORMATION CONTACT: Ms. Julie Binder Maitra, U.S. Geological Survey, Federal Geographic Data Committee, jmaitra@fgdc.gov, 703-648-4627.

SUPPLEMENTARY INFORMATION: Part 1, Logical Specifications, consists of three main sections that explain the SDTS conceptual model and SDTS spatial object types, components of a data quality report, and the layout of all SDTS modules. The U.S. Geological Survey (USGS) is the maintenance authority for Part 1.

Part 2, Spatial Features, contains a catalogue of spatial features and associated attributes. It addresses a need for definition of common spatial feature terms to ensure greater compatibility in data transfers. It is limited to small- and medium-scale spatial features commonly used on topographic quadrangle maps and hydrographic charts. The USGS is the maintenance authority for Part 2.

Part 3, ISO 8211 Encoding, explains the use of ISO/IEC 8211:1994, Information technology—Specification for a data descriptive file for information interchange, to create SDTS file sets (i.e., transfers). Geography Markup Language (GML), which the FGDC has endorsed, now satisfies the encoding requirements that SDTS once provided. The USGS is the maintenance authority for Part 3.

Part 4, Topological Vector Profile (TVP), is an SDTS profile that limits options and identifies specific requirements for SDTS transfers of data sets consisting of topologically structured area and linear spatial features. The USGS is the maintenance authority for Part 4.

For more information about Parts 1-4 and links to Parts 1-4, visit <http://mcmweb.er.usgs.gov/sdts/standard.html>.

Part 5, Raster Profile and Extensions, is a profile for 2-dimensional image and gridded raster data. It permits alternate image file formats using the ISO Basic

Image Interchange Format (BIIF) or Georeferenced Tagged Information File Format (GeoTIFF). The USGS is the maintenance authority for Part 5. For more information about and a link to SDTS Part 5, visit http://www.fgdc.gov/standards/projects/FGDC-standards-projects/SDTS/sdts_pt5/index.html.

Part 6, Point Profile, is designed to transfer and archive digital geospatial point data that can have very precise locations. High precision National Geodetic Survey (NGS) geodetic network control point data and Bureau of Land Management (BLM) survey point data can use this profile. The NGS is the maintenance authority for Part 6. The NGS no longer supports download of NGS datasheets in SDTS format. The NGS now offers users the ability to download geodetic control datasheets in plain ASCII text and Shapefiles instead. For more information about and a link to SDTS Part 6, visit http://www.fgdc.gov/standards/projects/FGDC-standards-projects/SDTS/sdts_point/index.html.

Part 7, Computer Aided Design and Drafting (CADD) Profile, contains specifications for an SDTS profile for use with vector-based geographic data as represented in CADD software. This profile facilitates the translation of data between CADD packages without loss of data and between CADD and mainstream GIS packages. CADD software allows for several types of elements, in particular, three-dimensional elements and complex curves that are not commonly used by GIS. The U.S. Army Corps of Engineers is the maintenance authority for Part 7. It is no longer using the standard. For more information about and a link to SDTS Part 7, visit http://www.fgdc.gov/standards/projects/FGDC-standards-projects/SDTS/sdts_cadd/index.html.

Following the 90-day public comment period, the FGDC Standards Coordinator will collate comments into a report. The report and a recommendation based on the report will be forwarded to the FGDC Coordination Group (CG) for approval. The report and CG recommendation will then be forwarded to the FGDC Steering Committee for final decision. Following the FGDC Steering Committee decision, the decision will be announced on the FGDC Web site, <http://www.fgdc.gov>, and the **Federal Register**.

The FGDC coordinates the development of the National Spatial Data Infrastructure (NSDI), which encompasses the policies, standards, and procedures for organizations to cooperatively produce and share geospatial data. Federal agencies that make up the FGDC develop the NSDI in
