

Mitigation Measures

In the *Final Hanford Comprehensive Land-Use Plan Environmental Impact Statement (Hanford Comprehensive Land-Use Plan EIS)* (DOE/EIS-0222, September 1, 1999) DOE identified specific mitigation measures, policies, and management controls that direct land use at Hanford. DOE committed to these mitigation measures, as documented in the *Hanford Comprehensive Land-Use Plan EIS* ROD (64 FR 61615 November 12, 1999), which were reaffirmed in the *Supplement Analysis, Hanford Comprehensive Land-Use Plan EIS* (EIS-0222-SA-02, June 2, 2008) and in the amended ROD (73 FR 55824, September 26, 2008). These mitigation measures will continue to be implemented, as applicable, for the tank waste retrieval and treatment activities discussed in the *TC&WM EIS*. The *TC&WM EIS* did not identify any mitigation measures for the short-term resource areas that are needed in addition to those in the *Supplement Analysis, Hanford Comprehensive Land Use Plan EIS* and its amended ROD.

DOE has continued to evaluate potential mitigation measures for the contaminated soil at Hanford for several years. Most recently, DOE published the *Long-Range Deep Vadose Zone Program Plan* in October 2010. This program plan summarizes the current state of knowledge regarding deep vadose zone remediation challenges beneath the Central Plateau at Hanford and DOE's approach to solving these challenges. The challenges to implementing deep vadose zone remediation are the result of contaminant depth and spread; the presence of multiple contaminants and comingled waste chemistries; physical, chemical, and biological fate and transport mechanisms; uncertain contaminant behavior; limited availability and effectiveness of cleanup remedies; and the unknown efficacy of remediation performance over the periods and spatial scales needed for making decisions.

Nevertheless, all practicable means to avoid or minimize environmental harm for the decisions identified have been adopted. DOE will prepare and implement a Mitigation Action Plan to address long-term impact areas. Long-term mitigation measures related to SST closure will be refined and presented in the *TC&WM EIS* Mitigation Action Plan, which will be posted on the Hanford and DOE NEPA Web sites identified in **ADDRESSES**. DOE will periodically revisit and update the Mitigation Action Plan as appropriate prior to initiating actions pursuant to this ROD.

Issued in Washington, DC, on December 6, 2013.

Proposed Project

The National Health Interview Survey (NHIS), (OMB No. 0920-0214, Expiration 03/31/2016)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The annual National Health Interview Survey is a major source of general statistics on the health of the U.S. population and has been in the field continuously since 1957. Clearance is sought for three years, to collect data for 2014, 2015, and 2016. This voluntary and confidential household-based survey collects demographic and health-related information on a nationally representative sample of persons and households throughout the country. Personal identification information is requested from survey respondents to facilitate linkage of survey data with health related administrative and other records. Each year we collect information from up to 55,000 households, which contain about 137,500 individuals.

Information is collected using computer assisted personal interviews (CAPI). A core set of data is collected each year that remains largely
