

OMB Approval Number: 3145–NEW.
Type of Request: Intent to seek approval to establish an information collection.

Abstract: The NSF Division of Materials Research (DMR) supports a number of National user facilities that provide specialized capabilities and instrumentation to the scientific community on a competitive proposal basis. In addition to the user program, these facilities support in-house research, development of new instrumentation or techniques, education, and knowledge transfer.

The facilities integrate research and education for students and post-docs involved in experiments, and support extensive K–12 outreach to foster an interest in Science Technology Engineering and Mathematics (STEM) and STEM careers. Facilities capitalize on diversity through participation in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering. National User Facilities will be required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. User facilities will be required to develop a set of management and performance indicators for submission annually to NSF via the Research Performance Project Reporting (RPPR) module in Research.gov. These indicators are both quantitative and descriptive and may include, for example, lists of successful proposal and users, the characteristics of facility personnel and students; sources of financial support and in-kind support; expenditures by operational component; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students supported through the facility or users of the facility; descriptions of significant advances and other outcomes of this investment. Such reporting requirements are included in the cooperative agreement, which is binding between the academic institution and the NSF.

Each facility's annual report will address the following categories of activities: (1) Research, (2) education, (3) knowledge transfer, (4) partnerships, (5) diversity, (6) management, and (7) budget issues. For each of the categories the report will describe overall objectives and metrics for the reporting period, challenges or problems the facility has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

Facilities are required to file a final report through the RPPR. Final reports contain similar information and metrics as annual reports, but are retrospective.

Use of the Information: NSF will use the information to continue funding of the DMR national user facilities, and to evaluate the progress of the program.

Estimate of Burden: 790 hours per facility for three national user facilities for a total of 2,370 hours.

Respondents: Non-profit institutions.

Estimated Number of Responses per Report: One from each of the DMR user facilities.

Dated: December 20, 2013.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. NRC–2013–0279]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of pending NRC action to submit an information collection request to the Office of Management and Budget (OMB) and solicitation of public comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) invites public comment about our intention to request the OMB's approval for renewal of an existing information collection that is summarized below. We are required to publish this notice in the **Federal Register** under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* 10 CFR Part 19, Notices, Instructions, and Reports to Workers: Inspection and Investigations.

2. *Current OMB approval number:* 3150–0044.

3. *How often the collection is required:* As necessary in order that adequate and timely reports of radiation exposure be made to individuals involved in NRC-licensed activities.

4. *Who is required or asked to report:* Licensees authorized to receive, possess, use, or transfer material licensed by the NRC.

5. *The number of annual respondents:* 700.

6. *The number of hours needed annually to complete the requirement or request:* 213,517.5

7. *Abstract:* Title 10 of the *Code of Federal Regulations*, Part 19, requires licensees to advise workers on an annual basis of any radiation exposure in excess of 1mSv (100 mrem) they may have received as a result of NRC-licensed activities or when certain conditions are met. These conditions apply during termination of the worker's employment, at the request of the workers, former workers, or when the worker's employer (the NRC licensee) must report radiation exposure information on the worker to the NRC. Part 19 also establishes requirements for instructions by licensees to individuals participating in licensed activities and options available to these individuals in connection with Commission inspections of licensees to ascertain compliance with the provisions of the Atomic Energy Act of 1954, as amended, Title II of the Energy Reorganization Act of 1974, and regulations, orders and licenses there under regarding radiological working conditions.

The worker should be informed of the radiation dose he or she receives because: (a) That information is needed by both a new employer and the individual when the employee changes jobs in the nuclear industry; (b) the individual needs to know the radiation dose received as a result of the accident or incident (if this dose is in excess of the 10 CFR Part 20 limits) so that he or she can seek counseling about future work involving radiation, medical attention, or both, as desired; and (c) since long-term exposure to radiation may be an adverse health factor, the individual needs to know whether the accumulated dose is being controlled within NRC limits. The worker also needs to know about health risks from occupational exposure to radioactive materials or radiation, precautions or procedures to minimize exposure, worker responsibilities and options to report any licensee conditions which may lead to or cause a violation of Commission regulations, and individual radiation exposure reports which are available to him.

Submit, by February 28, 2014, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

The public may examine and have copied for a fee publicly available documents, including the draft supporting statement, at the NRC's Public Document Room, Room O-1F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. The OMB clearance requests are available at the NRC's Web site: <http://www.nrc.gov/public-involve/doc-comment/omb/>. The document will be available on the NRC's home page site for 60 days after the signature date of this notice.

Comments submitted in writing or in electronic form will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed. Comments submitted should reference Docket No. NRC-2013-0279. You may submit your comments by any of the following methods: Electronic comments go to <http://www.regulations.gov> and search for Docket No. NRC-2013-0279. Mail comments to the NRC Clearance Officer, Tremaine Donnell (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

Questions about the information collection requirements may be directed to the NRC Clearance Officer, Tremaine Donnell (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone at 301-415-6258, or by email to INFOCOLLECTS.Resource@NRC.GOV.

Dated at Rockville, Maryland, this 24th day of December, 2013.

For the Nuclear Regulatory Commission.
Tremaine Donnell,
NRC Clearance Officer, Office of Information Services.

BILLING CODE 7950-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52-014 AND 52-015; NRC-2008-0043]

Tennessee Valley Authority, Exemption From the Requirement To Submit an Annual Update to the Final Safety Analysis Report Included in a Combined License Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to an October 28, 2013, request from Tennessee Valley Authority (TVA). On September 29, 2010, TVA requested that the NRC suspend review of its combined license (COL) application until further notice. On October 28, 2013, TVA requested an exemption from certain regulatory requirements that require them to submit updates to the Final Safety Analysis Report (FSAR) included in their COL Application until requesting the NRC to resume its review of their COL application. The NRC staff reviewed this request and determined that it is appropriate to grant the exemption, but stipulated that the updates to the FSAR must be submitted prior to requesting the NRC resume its review of the COL application or by December 31, 2014, whichever comes first.

ADDRESSES: Please refer to Docket ID NRC-2008-0043 when contacting the NRC about the availability of information regarding this document. You may access publicly-available information related to this action by the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC-2008-0043. Address questions about NRC dockets to Carol Gallagher; telephone: 301-287-3422; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may access publicly available documents online in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The ADAMS accession number for each document referenced in this document (if that document is available in ADAMS) is provided the first time that the document is referenced.

- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Anthony Minarik, Office of New

Reactors, U.S. Nuclear Regulatory Commission, Washington, DC, 20555-0001; telephone: 301-415-6185; email: Anthony.Minarik@nrc.gov.

SUPPLEMENTARY INFORMATION:

The following sections include the text of the exemption in its entirety as issued to TVA.

1.0 Background

On October 30, 2007 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML073110527) Tennessee Valley Authority (TVA), submitted to the U.S. Nuclear Regulatory Commission (NRC) a Combined License (COL) application for two units of Westinghouse Electric Company's AP1000 advanced pressurized water reactors to be constructed and operated at the Bellefonte site, located near the cities of Hollywood and Scottsboro in Jackson County in northeast Alabama. (Docket numbers 052000-14 and 052000-15). The NRC docketed the Bellefonte Nuclear Plant, Units 3 and 4 (BLN 3&4) COL application on January 28, 2008. On September 29, 2010 (ADAMS Accession No. ML10274076) TVA requested that the NRC defer the review of the BLN 3&4 COL application. In a letter dated November 24, 2010 (ADAMS Accession No. ML102930207), the NRC granted TVA's request to defer the review and stated it was in a suspended status, meaning all review activities related to the BLN 3&4 COL application were eventually suspended after a closeout period while the application remained docketed. On October 28, 2013 (ADAMS Accession No. ML13325B058) TVA requested an exemption from the Title 10 of the *Code of Federal Regulations* (10 CFR) 50.71(e)(3)(iii) requirements to submit COL application Final Safety Analysis Report (FSAR) updates.

2.0 Request/Action

10 CFR 50.71(e)(3)(iii) requires that an applicant for a COL under Subpart C of 10 CFR Part 52, submit updates to their FSAR annually during the period from docketing the application to the Commission making its 52.103(g) finding.

Pursuant to 10 CFR 50.71(e)(3)(iii) the next annual update of the FSAR included in the BLN 3&4 COL application would be due in January of 2014 as TVA's application was docketed on January 28, 2008 and TVA had submitted Revision 3 to its FSAR on December 22, 2010 (ADAMS Accession No. ML110040748). In a letter dated, September 29, 2010 (ADAMS Accession No. ML10274076) TVA requested that the NRC suspend review of the BLN 3&4
