SUPPLEMENTARY INFORMATION:**A. Purpose**

As a first step in assuring that
Government contracts are not awarded
to firms violating anti-trust laws,
offerors on Government contracts must
complete the certificate of independent
price determination. The Contracting
Officer will reject certificates where the
offeror has deleted or modified portions
of the certificate and has not furnished
with the certificate a signed statement of
the circumstances of disclosure of
prices. Agencies are required to report

to the Attorney General rejected offers
where the offeror deleted or modified
the certificate or the certificate is
suspected of being false.

The information collection is required
each time an offeror responds to a
solicitation for firm-fixed price contract
or fixed-price economic price
adjustment contract unless the
acquisition is (1) made under the
simplified acquisition threshold; (2) at
the request for technical proposals
under two-step sealed bidding
procedures; or (3) for utility services for
which rates are set by law or regulation.
The FAR rule requires a Certificate of
Independent Price Determination so that
contractors certify that the prices in
their offer have been arrived at
independently, have not been or will
not be knowingly disclosed, and have
not been submitted for the purpose of
restricting competition. This clause does
not apply to commercial items.

B. Annual Reporting Burden

A reassessment of FAR 3.103 and FAR
52.203-2 was performed. Based on the
comprehensive reassessment performed,
this information collection resulted in a
slight decrease in the annual number of
responses and an increase in the annual
time burden from the previous
information collection that was
published in the **Federal Register** at 76
FR 37353 on June 27, 2011. The
decrease in the annual number of
responses is likely a result of updated
data for Fiscal Year (FY) 2013 from the
Federal Procurement Data System
(FPDS). The increase in the annual time
burden from the previous information
collection increases the amount of time
to research and prepare the certification
from .01 hours (less than one minute) to
.25 hours (15 minutes). No public
comments were received in prior years
that have challenged the validity of the
Government's estimate. Updates were
made to the average wages and overhead
based on FY 2013 Office of Personnel
Management and Office of Management
and Budget rates.

Respondents: 13,486.

Responses per Respondent: 76.
Total Responses: 1,024,936.
Hours per Response: .25.
Total Burden hours: 256,234.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals:

Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 9000-0018, telephone 202-501-4755. Please cite OMB Control No. 9000-0018, Certification of Independent Price Determination and Parent Company and Identifying Data, in all correspondence.

Dated: April 8, 2014.

Karlos Morgan,

Acting Director, Federal Acquisition Policy Division, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Proposed Project

Sexually Transmitted Infection Services at U.S. Colleges and Universities—New—National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Approximately 43% of the over 30 million 18-24 year olds in the United States are currently enrolled in college or graduate school. These institutions comprise a mix of 2-year and 4-year colleges, public and private institutions, technical schools, and community colleges. In the U.S. young adulthood is the peak age group for many risk behaviors including unprotected sex. College students, who are typically at the age of most risk for acquiring a sexually transmitted infection (STI), may face challenges when seeking sexual and reproductive health care on campus.

The last national study exploring the availability of STI services in U.S. colleges and universities (2- and 4-year) was conducted in 2001 and found that only 60% (474/736) of schools had a health center. Health centers were more common among larger schools (greater than 4,000 students) that were privately funded and 4-year universities with
