Discussion

Historically, the Coast Guard has relied upon the language found in 46 CFR part 4 to assist regulated industry stakeholders in determining if an occurrence is a reportable marine casualty. Information and data collected by the Coast Guard during marine casualty investigations are used by a wide audience for many purposes from enforcement of laws to enhancement of prevention activities (i.e., safety alerts and standards). Therefore, it is critical that casualty information be consistently captured. In addition, even minor incidents provide valuable leading indicator and trend analysis information critical for an effective prevention program.

Due to the complexity of the subject, the Coast Guard recognizes that additional clarification of these requirements would benefit both the Coast Guard and the regulated industry. Such clarification furthers the Coast Guard's goal of providing consistent national guidance regarding marine casualty reporting to all stakeholders. Because marine casualties occur among a wide range of vessel types and operations, a consistent national framework must outline expectations and alleviate confusion.

The draft NVIC lays the appropriate foundation for this consistent capture of marine casualty data by clarifying existing regulations, policies, and procedures. Specifically, the draft NVIC assists responsible parties in the proper evaluation of occurrences that constitute

a reportable marine casualty and subsequently require action by both Coast Guard and maritime industry stakeholders.

Persons reporting marine casualties should make every effort by any means available to immediately notify the nearest Coast Guard Command Center. The notification must include the information required by 46 CFR 4.05–5. A written follow-up report meeting the requirements of 46 CFR 4.05–10 must be submitted within 5 days. If there is any doubt whether an occurrence is a reportable marine casualty, we encourage you to contact the nearest Officer in Charge, Marine Inspection staff (typically via the nearest Coast Guard Command Center) to determine an appropriate response.

We encourage readers to review the entire draft NVIC, available in the docket. We request comments from all interested parties to ensure that the full range and significance of issues addressed in the draft NVIC are identified prior to final promulgation.
