

made available in print and electronically on the NSF Web site. Restricted-use and public use data files will also be developed.

The survey will be collected in conformance with the Privacy Act of 1974 and the Confidential Information Protection and Statistical Efficiency Act (CIPSEA). Responses from individuals are voluntary. The NSF will ensure that all individually identifiable information collected will be kept strictly confidential and will be used for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

2. *Expected Respondents:* There are four types of respondents to the survey: Institutional high authority (HA), list coordinator (LC), ECD contactor (EC), and individual ECD. The HA, LC, and EC are involved at the first stage of the sample survey design. At each institution, a high authority (HA) will authorize the institution's participation

in the study, designate a list coordinator (LC) and an ECD contactor (EC), and provide a letter of support for the survey. The primary responsibility of the LC is to prepare a list of ECD employed at the institution. The LC will provide a list of all ECD, that is, individuals working at their institution who earned their first doctorate or doctorate-equivalent degree within the past 10 years, including postdocs, nonfaculty researchers, tenured or tenure-track faculty members.

In the second stage, the EC will notify the sampled individual of their selection and NSF will survey these individuals. The survey will sample 8,250 ECD from 201 institutions. It is expected that 80% of the sampled ECD will participate, yielding 6,600 ECD respondents.

3. *Estimate of Burden:* In the methodological study, HAs required 1 hour on average to complete these tasks while the LCs required an average of 6

hours to fulfill their duties. Assuming that 100% of the institutions will participate, we estimate the total HA burden to be 201 hours and total burden for LCs is 1,206 hours. Most ECs were able to complete this task in less than 30 minutes in the methodological study. It is expected that 5% of the sampled institutions will choose to have NSF contact the ECD directly without involvement of ECs. We estimate a total burden of 96 hours for ECs.

NCSES estimates that respondents will take 30 minutes on average to complete the questionnaire based on the time to completion data from the methodological study. Assuming 6,600 respondents, we estimate the total burden for ECD to be 3,300 hours.

Taking into account all four respondent types (HAs, LCs, ECs, and ECD), we estimate the total respondent burden to be 4,803 hours. The below table showed the estimated burden by stage and respondent type.

ECDS ESTIMATED BURDEN BY STAGE AND RESPONDENT TYPE

Respondent type	Minutes per respondent	Number of respondents	Expected response rate (%)	Estimated total hours
<i>Stage 1: Frame Creation:</i>				
High Authority (HA) .....	60	201	100	201
List Coordinator (LC) .....	360	201	100	1,206
<i>Subtotal</i> .....				<i>1,407</i>
<i>Stage 2: ECD Survey:</i>				
ECD Contactor (EC) .....	30	201	95	96
Early Career Doctorate (ECD) .....	30	8,250	80	3,300
<i>Subtotal</i> .....				<i>3,396</i>
<b>Total</b> .....				<b>4,803</b>
