

activities associated with decommissioning, site restoration, and irradiated fuel management. There is no decrease in safety associated with the Trusts being used to fund activities associated with irradiated fuel management and site restoration activities. In the March 12, 2014, letter, the licensee confirmed its understanding that the limitations on the use of radiological decommissioning funds remain in effect, limiting access to those portions of the funding in the Trusts. 10 CFR 50.82(a)(8)(v) requires licensees to submit a financial assurance status report annually between the time of submitting its decommissioning cost estimate and submitting its final radiation survey and demonstrating that residual radioactivity has been reduced to a level that permits termination of its license. If the remaining balance plus expected rate of return plus any other financial surety mechanism does not cover the estimated costs of completion of decommissioning, additional financial assurance must be provided. These annual reports provide a means for NRC to monitor the adequacy of available funding. Since the exemption would allow SCE to use funds from the Trusts that are in excess of those required for radiological decontamination of the site and the adequacy of funds dedicated for radiological decontamination are not affected by the proposed exemption, there is reasonable assurance that there will be no environmental impact due to lack of adequate funding for decommissioning.

The proposed action will not significantly increase the probability or consequences of accidents. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not have any foreseeable impacts to land, air, or water resources, including impacts to biota. In addition, there are also no known socioeconomic or environmental justice impacts associated with such proposed action. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (i.e., the “no-action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for SONGS Units 2 and 3, dated May 12, 1981.

Agencies or Persons Consulted

The staff did not enter into consultation with any other Federal Agency or with the State of California regarding the environmental impact of the proposed action. On May 22, 2014, the California state representatives were notified of the EA and FONSI.

III. Finding of No Significant Impact

The licensee has proposed exemptions from 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(2) which would allow SCE to use funds from the Trusts for irradiated fuel management and site restoration activities, without prior written notification to the NRC.

The NRC decided not to prepare an Environmental Impact Statement for the proposed action. On the basis of the environmental assessment included in Section II above and incorporated by reference in this finding, the NRC concludes that the proposed action will not have significant effects on the quality of the human environment.

Other than the licensee's letters, dated February 13, 2014, as supplemented by letter dated March 12, 2014, there are no other environmental documents associated with this review. These documents are available for public inspection as indicated above.

Dated at Rockville, Maryland, this 15th day of July, 2014.

For the Nuclear Regulatory Commission.

Douglas A. Broaddus,

Chief, Plant Licensing Branch IV-2 and Decommissioning Transition Branch, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

Advisory Committee on Reactor Safeguards (ACRS) Meeting of the ACRS Joint Subcommittees on Reliability and PRA and Fukushima; Notice of Meeting

The ACRS Joint Subcommittees on Reliability and PRA and Fukushima will hold a meeting on August 22, 2014, Room T-2B1, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance with the exception of portions that may be closed to protect information that is proprietary pursuant to 5 U.S.C. 552b(c)(4). The agenda for the subject meeting shall be as follows:

The agenda for the subject meeting shall be as follows:

Friday, August 22, 2014—8:30 a.m. Until 5:00 p.m.

The Joint Subcommittee will review the status of the filtering strategies rulemaking and a human reliability analysis methodology applied to this rulemaking. The Joint Subcommittee will hear presentations by and hold discussions with the NRC staff and other interested persons regarding this matter. The Joint Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Weidong Wang (Telephone 301-415-6279 or Email: Weidong.Wang@nrc.gov) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on November 8, 2013 (78 CFR 67205-67206).

Detailed meeting agendas and meeting transcripts are available on the NRC

Web site at <http://www.nrc.gov/reading-rm/doc-collections/acrs>. Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO.

Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (Telephone 240-888-9835) to be escorted to the meeting room.

Date: July 16, 2014.

Cayetano Santos,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.
