This request is for an extension of a currently approved information collection.

The Rockfish Program determines the access and allocation of the Central Gulf of Alaska (GOA) rockfish fisheries and associated halibut prohibited species catch (PSC), also known as the rights of access to the fishery. Cooperatives were established to receive exclusive harvest privileges for rockfish primary and secondary species. These resource allocations are used to assign the available resources in an economic way. In the case of halibut, a specific amount of halibut mortality is assigned to the

cooperative, because halibut is often caught incidentally with rockfish.

The rockfish fisheries are conducted in Federal waters near Kodiak, Alaska, primarily by trawl vessels, and to a lesser extent by longline vessels. The Rockfish Program allocates harvest privileges to holders of License Limitation Program (LLP) licenses with a history of Central GOA rockfish landings associated with those licenses.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection.

The Alaska Pacific Halibut Charter Program established Federal Charter Halibut Permits (CHPs) for operators in the charter halibut fishery in IPHC regulatory Areas 2C (Southeast Alaska) and 3A (Central Gulf of Alaska). Since

February 1, 2011, all vessel operators in Areas 2C and 3A with charter anglers onboard catching and retaining Pacific halibut must have a valid CHP onboard during every charter vessel fishing trip. CHPs must be endorsed with the appropriate regulatory area and number of anglers.

The National Marine Fisheries Service (NMFS) implemented this program based on recommendations by the North Pacific Fishery Management Council to meet allocation objectives in the charter halibut fishery. This program provides stability in the fishery by limiting the number of charter vessels that may participate in Areas 2C and 3A and decreasing the overall number of available CHPs over time. The program goals are to increase the value of the resource, limit boats to qualified active participants in the guided sport halibut sector, and enhance economic stability in rural coastal communities.
