Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated May 20, 2014, Lake Superior Railroad Museum (LSRM) petitioned the Federal Railroad Administration (FRA) for renewal of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 223, Safety Glazing Standards—Locomotives, Passenger Cars, and Cabooses. FRA assigned the petition Docket Number FRA-1999-6072.

LSRM seeks an extension of relief from the Safety Glazing Standards for operation of former Great Northern Railway Diesel Locomotive Number 192, built by General Motors in 1946. LSRM seeks to operate this locomotive in excursion service with other antique rolling stock over 26 miles of the North Shore Scenic Railroad and 1,500 feet of Canadian National Railway (former Duluth, Missabe and Iron Range) track between Duluth and Two Harbors, MN. As described in the previous waiver approval, the locomotive is equipped with a mix of FRA Type I and II glazing and other glazing identified as "shatterproof."

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2014-0066]

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated May 28, 2014, Union Pacific Railroad (UP) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 229. FRA assigned the petition Docket Number FRA-2014-0066.

UP seeks a waiver of the requirement in 49 CFR 229.29(b) which requires that the air flow method (AFM) indicator on a locomotive be calibrated in accordance with 49 CFR 232.205(c)(1)(iii) at intervals not to exceed 92 days. UP states that calibration of the AFM indicator requires them to take locomotives out of service every 92 days and into a facility where the calibration can be performed, even though the locomotive may otherwise be eligible for 184-day periodic inspections. UP further states that the AFM indicator is used only to conduct AFM brake tests, and that the same air brake tests may be performed by the leakage test method, which does not use the AFM indicator. If the waiver is granted for locomotives with past due AFM indicator calibration, UP plans to inform the crew of the exceeded interval and require that air brake tests be done in accordance with the leakage test method of 49 CFR 232.205(c)(1)(i), with no resulting adverse impact on the safety of operations.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue SE., W12-140, Washington, DC 20590.
