California State Nonroad Engine Pollution Control Standards; Off-Highway Recreational Vehicles and Engines; Notice of Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of decision.

SUMMARY: The Environmental Protection Agency (EPA) is granting the California Air Resources Board's (CARB's) request for authorization of amendments to California's Off-Highway Recreational Vehicles and Engines (OHRV) regulations, confirming that certain OHRV amendments are within-the-scope of prior EPA authorizations, and confirming that certain OHRV amendments are not preempted by Clean Air Act. CARB's OHRV regulations apply to all off-highway recreational vehicles (and to engines manufactured for use in such vehicles) produced on or after January 1, 1997, for sale, lease, use and introduction into commerce in California. This decision is issued under the authority of the Clean Air Act (CAA or Act).

DATES: Petitions for review must be filed by April 7, 2014.

SUPPLEMENTARY INFORMATION:

I. Background

In 1994, CARB adopted emission standards and test procedures for OHRVs. At that time, there were no analogous federal standards regulating emissions from the vehicles and engines covered by California's OHRV regulations. EPA authorized CARB's

1994 OHRV regulations in 1996.¹ California subsequently adopted three rounds of amendments to these regulations, the first in 1999, the second in 2003, and the third in 2006. CARB requested that EPA authorize each of these three amendment packages in letters dated March 24, 2000, November 19, 2004, and March 24, 2010, respectively.² The March 24, 2010 request explicitly incorporates the previous two requests, and EPA here considers all three requests concurrently.

A. California's Authorization Requests

The 1999 OHRV amendments did not change the numerical exhaust emission standards for OHRVs, but added a new compliance category that allowed OHRVs not meeting the applicable emissions standards to be certified subject to use restrictions (i.e., use in specified areas during specified times of the year). Such non-emissions-compliant OHRVs would be identified with a red sticker or "red tag," while emissions-compliant OHRVs would be identified with a green sticker or "green tag." The amendments also removed a competition vehicle exemption provision and added all-terrain vehicles (ATVs) over 600 pounds (lbs) to the existing definition of ATV. CARB requested that EPA confirm a within-the-scope determination for the red tag program and for the removal of the competition exemption, and grant a full authorization for the addition of ATVs over 600 lbs.

According to CARB, the goal of the 1999 amendments was to provide economic relief to vehicle dealers in California who were contractually bound to sell products that did not meet the emission standards California established in 1994.³ Prior to the 1999 amendments, two-stroke off-highway motorcycles could only be sold as competition models, and their use was limited to closed-course competitions. Following the amendments, such competition vehicles would be red tagged and allowed to operate during certain times of the year in certain geographic areas. The amendments provided for red tagged vehicles to be certified and sold in California and to be
