The patent rights in this invention have been assigned to the Government of the United States of America. The territory of the prospective Start-Up Exclusive Patent License Agreement may be worldwide and the field of use may be limited to: Use of compounds covered by Patent Rights for diagnosis of human thyroid cancer requiring FDA premarket approval or an equivalent authority outside of the United States, and treatment of human thyroid cancer.

DATES: Only written comments or applications for a license (or both) which are received by the NIH Office of Technology Transfer on or before December 26, 2014 will be considered.

ADDRESSES: Requests for copies of the patent application, inquiries, comments, and other materials relating to the contemplated Start-Up Exclusive Patent License Agreement should be directed to: Lauren Nguyen-Antczak, Ph.D., J.D., Licensing and Patenting Manager, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804; Telephone: (301) 435–4074; Facsimile: (301) 402–0220; Email: Lauren.Nguyen-antczak@nih.gov. SUPPLEMENTARY INFORMATION: This invention concerns small molecule compounds that agonize the activity of the thyroid stimulating hormone receptor (“TSHR”). These TSHR agonists enhance or activate the thyroid stimulating hormone (“TSH”) signaling pathway by directly binding to the transmembrane domain of TSHR. Invention compounds may be administered alone or in combination with radioactive iodine to detect thyroid cancer cells. Additionally, invention compounds may be administered in combination with radioactive iodine to treat thyroid cancer, such as to ablate thyroid remnants in patients after a thyroidectomy.

The prospective Start-Up Exclusive Patent License is being provided under the small business initiative launched on 1 October 2011. The prospective Start-Up Exclusive Patent License may be granted unless the NIH receives written evidence and argument, within fifteen (15) days from the date of this published notice, that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

Complete applications for a license in the prospective field of use that are filed in response to this notice will be treated as objections to the grant of the contemplated Start-Up Exclusive Patent License. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.
