Endangered and Threatened Wildlife and Plants; Taxonomy of the Hawaiian Monk Seal

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are amending the List of Endangered and Threatened Wildlife to reflect the scientifically accepted taxonomy and nomenclature of the Hawaiian monk seal (*Neomonachus schauinslandi* (= *Monachus schauinslandi*)). This amendment is based on a previously published determination by the National Marine Fisheries Service (NMFS) of the National Oceanic and Atmospheric Administration, Department of Commerce, which has jurisdiction for this species.

DATES: This rule is effective March 10, 2015.

FOR FURTHER INFORMATION CONTACT: Jean Higgins, NMFS, Pacific Islands Regional Office, (808) 725-5151; or Marta Nammack, NMFS, Office of Protected Resources, (301) 427-8469.

SUPPLEMENTARY INFORMATION: In accordance with the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), and Reorganization Plan No. 4 of 1970 (35 FR 15627; October 6, 1970), NMFS has jurisdiction over the Hawaiian monk seal.

On November 17, 2014, NMFS published a direct final rule (79 FR 68371) to announce the revised taxonomy of the Hawaiian monk seal. Because NMFS did not receive any adverse comments during the first 30 days of the direct final rule's comment period, that direct final rule's effective date is January 16, 2015. Please refer to that rule for information on the taxonomy of the Hawaiian monk seal.

While NMFS has jurisdiction over the Hawaiian monk seal, we are responsible for updating the List of Endangered and Threatened Wildlife (List) in title 50 of the Code of Federal Regulations (CFR) at 50 CFR 17.11(h). This final rule is an administrative action to adopt the change already published by NMFS. This action ensures that the List shows the Hawaiian monk seal's most recently accepted scientific name in accordance with 50 CFR 17.11(b).

Administrative Procedure Act

Because NMFS provided a public comment period on the direct final rule to update the taxonomy and nomenclature of the Hawaiian monk seal, and because this action of the Service to amend the List in accordance with the determination by NMFS is nondiscretionary, the Service finds good cause that the notice and public comment procedures of 5 U.S.C. 553(b) are unnecessary for this action. We also find good cause under 5 U.S.C. 553(d)(3) to make this rule effective immediately. This rule is an administrative action to reflect the scientifically accepted taxonomy and nomenclature of the Hawaiian monk seal in the List of Endangered and Threatened Wildlife at 50 CFR 17.11(h). The public would not be served by delaying the effective date of this rulemaking action.

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

Magnuson-Stevens Act Provisions; Fisheries Off West Coast States; Pacific Coast Groundfish Fishery; 2015-2016 Biennial Specifications and Management Measures; Amendment 24

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: This final rule would establish the 2015-2016 harvest specifications and management measures for groundfish taken in the U.S. exclusive economic zone off the coasts of Washington, Oregon, and California, consistent with the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Pacific Coast Groundfish Fishery Management Plan (PCGFMP), and approve Amendment 24 to the PCGFMP. This final rule would also revise the management measures that are intended to keep the total catch of each groundfish species or species complex within the harvest specifications. This action also includes regulations to implement Amendment 24 to the PCGFMP, which establishes default harvest control rules for setting harvest specifications after 2015-2016.

DATES: This final rule is effective March 10, 2015, except for the modifications to sorting requirements at §§ 660.130(d)(1)(i), 660.230(c)(2)(i), and 660.330(c)(2)(i), which are effective April 1, 2015.

ADDRESSES: Information relevant to this final rule and Amendment 24, which includes a final environmental impact statement (EIS), the Record of Decision (ROD), a regulatory impact review (RIR), final regulatory flexibility analysis (FRFA), and amended PCGFMP, are available from William Stelle, Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE., Seattle, WA 98115-0070. Executive Summary

Purpose of the Regulatory Action

This final rule implements the 2015-2016 harvest specifications and management measures for groundfish species taken in the U.S. exclusive economic zone off the coasts of Washington, Oregon, and California. The purpose of this action is to conserve and manage Pacific Coast groundfish fishery resources to prevent overfishing, to rebuild overfished stocks, to ensure conservation, to facilitate long-term protection of essential fish habitats

(EFH), and to realize the full potential of the Nation's fishery resources. The need for this action is to set catch limit specifications for 2015-2016 consistent with existing or revised harvest control rules for all stocks, and establish management measures designed to keep catch within the appropriate limits. These harvest specifications are set consistent with the optimum yield (OY) harvest management framework described in Chapter 4 of the PCGFMP. This final rule also implements Amendment 24 to PCGFMP. Amendment 24 establishes the default harvest control rules used to determine harvest specifications after 2015-2016. This rule is authorized by 16 U.S.C. 1854-55 and by the PCGFMP.

Major Provisions

This final rule contains two types of major provisions. The first are the harvest specifications (overfishing limits (OFLs), acceptable biological catches (ABCs), and annual catch limits (ACLs)), and the second are management measures designed to keep fishing mortality within the ACLs. The harvest specifications (OFLs, ABCs, and ACLs) in this rule have been developed through a rigorous scientific review and decision-making process, which is described in detail in the proposed rule for this action (80 FR 687, January 6, 2015) and is not repeated here.

In summary, the OFL is the maximum sustainable yield (MSY) harvest level and is an estimate of the catch level above which overfishing is occurring. OFLs are based on recommendations by the Council's Scientific and Statistical Committee (SSC) as the best scientific information available. The ABC is an annual catch specification that is the stock or stock complex's OFL reduced by an amount associated with scientific uncertainty. The SSC-recommended method for incorporating scientific uncertainty is referred to as the P star-sigma approach and is discussed in detail in the proposed and final rules for the 2011-2012 (75 FR 67810, November 3, 2010 and 76 FR 27508, May 11, 2011)
