The proposed take would occur on 199.4 acres (Permit Area) within the CEMEX Balcones Quarry Northeast Area tract in Comal County, Texas, as a result of activities associated with the Applicant's proposed clearing and implementation of quarrying activities (Covered Activities).

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, make available the draft Environmental Assessment (dEA) for the CEMEX Balcones Quarry Northeast Area Habitat Conservation Plan (CEMEX dHCP) and the dHCP. In accordance with the requirements of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), we advise the public that:

1. We have gathered the information necessary to determine impacts and formulate alternatives for the dEA related to potential issuance of an ITP to the Applicant; and

2. The Applicant has developed a dHCP as part of the application for an ITP, which describes the measures the Applicant has agreed to take to minimize and mitigate the effects of incidental take of GCWAs to the maximum extent practicable pursuant to section 10(a)(1)(B) of the Act.

The applicant has applied for an ITP that would be in effect for 15 years, if granted, and would authorize incidental take of the federally endangered GCWA. As described in the dHCP, the proposed incidental take would occur on 199.4 acres in Comal County, Texas, and would result from activities associated with otherwise lawful activities, including the clearing and implementation of quarrying activities (Covered Activities). The dEA considers the direct, indirect, and cumulative

effects of implementation of the dHCP, including the measures that will be implemented to minimize and mitigate, to the maximum extent practicable, the impacts of the incidental take of the GCWA.

Proposed Action

The proposed action involves the issuance of an ITP by the Service for the Covered Activities in the Permit Area, pursuant to section 10(a)(1)(B) of the Act. The ITP would cover “take” of the GCWA associated with the clearing and implementation of quarrying activities within the Permit Area.

The requested term of the permit is 15 years. To meet the requirements of a section 10(a)(1)(B) ITP, the Applicant has developed and proposes to implement its dHCP, which describes the conservation measures the Applicant has agreed to undertake to minimize and mitigate for the impacts of the proposed incidental take of the GCWA to the maximum extent practicable, and ensures that incidental take will not appreciably reduce the likelihood of the survival and recovery of the species in the wild.

The Applicant proposes to mitigate with the purchase of 147.44 acres of high-quality habitat, likely from a Service-approved conservation bank with Comal County in its service area.

Alternatives

The only alternative to the proposed action we are considering as part of this process is the No Action alternative, in which no ITP would be issued. Under a No Action alternative, the Service would not issue the requested ITP for the CEMEX Balcones Northeast Area Tract, and, therefore, the Applicant would not implement the conservation measures described in the dHCP.

SUPPLEMENTARY INFORMATION:

I. Background

The ETA 203, Characteristics of the Insured Unemployed, is a monthly snapshot of the demographic composition of the claimant population in the Unemployment Insurance system. It is based on those who file a claim in the week containing the 19th day of the month, which reflects unemployment during the week containing the 12th day of the month. This corresponds with the sample frame used by the Bureau of Labor Statistics for the production of labor force statistics they produce. This report serves a variety of socio-economic needs because it provides aggregate data reflecting unemployment insurance claimants' sex, race/ethnic group, age, industry, and occupation.

II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
