Title: FERC–922, Performance Metrics for ISOs, RTOs and Regions Outside of ISOs and RTOs.

OMB Control No.: 1902–0262. Type of Request: Reinstatement and revision of an information collection.

Abstract: In September 2008, the United States Government Accountability Office (GAO) issued a report recommending that the Chairman of the Commission, among other actions, work with independent system operators (ISOs), regional transmission organizations (RTOs), stakeholders, and other experts to develop standardized measures that track the performance of ISO/RTO operations and markets and report the performance results to Congress and the public annually,1 while also providing interpretation of (1) what the measures and reported performance communicate about the benefits of ISOs/RTOs and, where appropriate, (2) changes that need to be made to address any performance concerns. The GAO Report also suggested that performance metrics be explored for non-ISOs/RTO regions.

In response to the GAO Report, Commission Staff conducted outreach with ISOs/RTOs and other stakeholders and in October 2010 established metrics

¹The 2008 GAO Report also recognized that the extent of the Commission's evaluation of ISO/RTO performance may vary from year to year.
