

fishing may be exempt from, at minimum, the following regulations:

1. The prohibition against interfering with or biasing the sampling procedure employed by an observer including physical, mechanical, or other sorting or discarding of catch before sampling, at § 679.7(g)(2);

2. the requirements to weigh all catch by an Amendment 80 vessel on a NMFS-approved scale at § 679.28(b);

3. the requirement for all catch by an Amendment 80 vessel to be made available for sampling by an observer at § 679.93(c)(1); and

4. the regulations that prohibit fish from being allowed to remain on deck unless an observer is present at § 679.93(c)(5).

EFP 2015–02 would require sea samplers for monitoring and data collection under the EFP. Sea samplers are NMFS-certified observers that conduct activities under an EFP rather than normal observer activities on an Amendment 80 vessel. In contrast with EFP 2012–01, the applicant proposes to commence EFP fishing with one instead of two sea samplers. This EFP would also allow for EFP fishing and regular commercial fishing to occur during a single fishing trip. To ensure that standards for catch accounting of target species, bycatch of groundfish and PSC are sufficient, the EFP applicant proposes to: (1) Provide advanced notification to NMFS and EFP staff of when deck sorting will commence, (2) provide a pre-cruise briefing with observer program staff, (3) phase-in electronic compliance monitoring on each vessel permitted under this EFP, and (4) record halibut mortality from the EFP in the catcher/processor elogbook.

In 2016, the AKSC would be required to submit to NMFS a report of the EFP results after EFP experimental fishing has ended in 2015. The report would include an estimate of halibut mortality from halibut sampled during the EFP and an estimate of halibut mortality under standard IPHC halibut mortality rates for those target fisheries.

Under the EFP, the AKSC would be limited to the AKSC's Amendment 80 groundfish allocation. The amount of halibut mortality accrued by the AKSC and under the EFP would not exceed the AKSC's 1,693 mt halibut mortality limit. The amount of halibut mortality applied to the EFP activities would be subject to review and approval by NMFS.

This EFP would be valid upon issuance in 2015 until either the end of 2015 or when the halibut mortality apportionment is reached in areas of the BSAI open to directed fishing by the Amendment 80 cooperative. EFP-

authorized fishing activities would not be expected to change the nature or duration of the groundfish fishery, gear used, or the amount or species of fish caught by the Amendment 80 cooperative.

The fieldwork that would be conducted under this EFP is not expected to have a significant impact on the human environment as detailed in the categorical exclusion prepared for this action (see **ADDRESSES**).

In accordance with § 679.6, NMFS has determined that the application warrants further consideration and has forwarded the application to the Council to initiate consultation. The Council is scheduled to consider the EFP application during its February 2015 meeting, which will be held at the Renaissance Hotel, Seattle. The EFP application will also be provided to the Scientific and Statistical Committee for review at the February Council meeting. The applicant has been invited to appear in support of the application.

Copies of the application and categorical exclusion are available for review from NMFS (see **ADDRESSES**).
