I. Additional Information on Submitting Comments

A. What should I consider as I prepare my comments for the EPA?

1. **Submitting CBI.** Do not submit this information to the EPA through www.regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to the EPA docket office specified in the *Instructions*, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for preparing your comments.** When submitting comments, remember to:

- a. Identify the notification by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- b. Explain your comments, why you agree or disagree; suggest alternatives and substitute data that reflects your requested changes.

- c. Describe any assumptions and provide any technical information and/or data that you used.

- d. Provide specific examples to illustrate your concerns, and suggest alternatives.

- e. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- f. Make sure to submit your comments by the comment period deadline identified.

II. Information Available for Public Comment

The EPA is requesting comment on two revised chapters of the EPA Air Pollution Control Cost Manual. The Control Cost Manual contains individual chapters on control measures, with data and equations available to aid users to estimate the capital costs for installation and annual costs for operation and maintenance of these measures. The Control Cost Manual is used by the EPA for estimating the impacts of rulemakings, and serves as a basis for sources to estimate costs of controls that are best available control technology (BACT) under the New Source Review (NSR), and best available retrofit technology (BART) under the Regional Haze Program, and for other programs.

The two revised Control Cost Manual chapters are the selective non-catalytic reduction (SNCR) and the selective catalytic reduction (SCR) chapters (Section 4, Chapters 1 and 2, respectively). The current Cost Manual version (sixth edition) is available at <http://epa.gov/ttn/catc/products.html#cccinfo>, and was last updated in 2003. The Consolidated Appropriations Act of 2014 requested that the EPA begin development of a seventh edition of the Cost Manual. The EPA has met with state, local, and tribal officials to discuss plans for the Control Cost Manual update as called for under the Consolidated Appropriations Act of 2014. The EPA has met with other groups as well at their request.

To help focus review of the SNCR and SCR chapters, we offer the following list of questions that the agency is particularly interested in addressing through this notice, although commenters are welcome to address any aspects of these chapters. Please provide supporting data for responses to these questions, and other aspects of the chapters, as mentioned above.

For the SNCR chapter:

- (1) What is a reasonable estimate of equipment life (defined as design or operational life) for this control measure?

(2) How do the costs of SNCR installation and operation differ between the electric power sector and industrial sources?

(3) What is a reasonable estimate of contingency, whether it be for one or more types, for this control measure?

For the SCR chapter:

(1) What is a reasonable estimate of equipment life (defined as design or operational life) for this control measure?

(2) How do the costs of SCR installation and operation differ between the electric power sector and industrial sources?

(3) What are typical SCR costs for catalyst replacement? In particular, please comment on the two different approaches for estimating catalyst replacement costs in this chapter. What are typical SCR costs for catalyst regeneration?

(4) What is a reasonable estimate of contingency, whether it be for one or more types, for this control measure?

Dated: June 5, 2015.

Director, Office of Air Quality Planning and Standards.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. Does this action apply to me?

This action is directed to the public in general. This action may, however, be of interest to those involved in the manufacture, processing, distribution, disposal, and/or interested in the assessment of risks involving chemical substances and mixtures. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What is EPA's authority?

This committee is being established under FACA, 5 U.S.C. Appendix 2.

II. Purpose and Function of the Chemical Safety Advisory Committee

The CSAC was established under FACA section 9(a) to provide advice and recommendations on the scientific basis for risk assessments, methodologies, and pollution prevention measures or approaches.

OPPT manages programs under the Toxic Substances Control Act (TSCA), 15 U.S.C. 2601 *et seq.*, and the Pollution Prevention Act (PPA), 42 U.S.C. 13101 *et seq.* Under these laws, EPA evaluates new and existing chemical substances and their risks, and finds ways to prevent or reduce pollution before it is released into the environment. OPPT also manages a variety of environmental stewardship programs that encourage companies to reduce and prevent pollution.

The CSAC will be composed of approximately ten members who will serve as Regular Government Employees (RGEs) or Special Government Employees (SGEs). The CSAC expects to meet in person or by electronic means (e.g., telephone, videoconference, webcast, etc.) approximately 3 to 4 times a year, or as needed and approved by the Designated Federal Officer (DFO). Meetings will be held in the Washington, DC or Virginia area. The CSAC will be examined annually and will exist until the EPA determines that the CSAC is no longer needed. The charter will be in effect for 2 years from the date it is filed with Congress. After the initial 2-year period, the charter may be renewed as authorized in accordance with section 14 of FACA (5 U.S.C. Appendix 2, Section 14). A copy of the charter will be available on the EPA Web site and in the docket.

III. Nominations Sought

Nominations for membership are being solicited through publication of this document in the **Federal Register** and through other sources. Any interested person or organization may nominate him or herself or any qualified individual to be considered for the CSAC.

Nominations should include candidates who have demonstrated high levels of competence, knowledge, and expertise in scientific/technical fields relevant to chemical risk assessment and pollution prevention. To the extent feasible, the members will include representation of the following disciplines, including, but not limited to: toxicology, pathology, environmental toxicology and chemistry, exposure assessment, and related sciences, e.g., synthetic biology, pharmacology, biotechnology, nanotechnology, biochemistry, biostatistics, pharmacologically based pharmacokinetic (PBPK) modeling, computational toxicology, epidemiology, environmental fate, and environmental engineering and sustainability. EPA values and welcomes diversity and encourages
