Abstract: These standards apply to all coke oven batteries, whether existing, new, reconstructed, rebuilt, or restarted. It also applies to all batteries using the conventional by-product recovery, the non-recovery process, or any new recovery process. The 2005 amendments establish more stringent requirements for the control of hazardous air pollutants from coke oven batteries that chose to comply with maximum achievable control technology (MACT) standards under the 1993 rule.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. Any owner/operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the United States Environmental Protection Agency (EPA) regional office.

Form Numbers: None.

Respondents/affected entities: Coke oven batteries.

Respondent’s obligation to respond: Mandatory (40 CFR part 63, subpart L).

Estimated number of respondents: 19 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 80,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,020,000 (per year), includes no annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated respondent labor burden as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. Rather, it was due to a discrepancy identified in the previous renewal, in which the number of by-product plants conducting daily leak inspections and bypass/bleeder stack/flare system inspections was overestimated. EPA has revised the estimates in this ICR to reflect the appropriate number of by-product plants. The net result of this adjustment was a decrease in respondent burden hours. There is also a small adjustment increase in the number of responses due to a correction. The previous ICR did not account for the notification of reconstruction, notification of battery closure, and malfunction report in calculating the number of responses.

Acting Director, Collection Strategies Division.

comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The U.S. Environmental Protection Agency (EPA) adopted requirements for marine vessels operating in and around U.S. territorial waters to use reduced-sulfur diesel fuel. This requirement does not apply for steamships, but it would apply for steamships that are converted to run on diesel engines. A regulatory provision allows vessel owners to qualify for a waiver from the fuel-use requirements for a defined period for such converted vessels. EPA uses the data to oversee compliance with regulatory requirements, including communicating with affected companies and answering questions from the public or other industry participants regarding the waiver in question.

Form Numbers: None.

Estimated number of respondents: 2 (total).

Frequency of response: Once

Currently approved estimated burden: 14 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Currently approved estimated cost: \$988 (per year), includes no annualized capital or operation & maintenance costs.

Changes in Estimates: The final ICR will address all changes in the estimates over the past three years.
