SUPPLEMENTARY INFORMATION: The following described public land has been examined and found suitable for classification for conveyance under Section 7 of the Taylor Grazing Act, 43 U.S.C. 315f, and the provisions of the R&PP Act as amended:

Salt Lake Meridian

T. 7 S., R. 1 W.,
Sec. 28, SW1/4.

The area described contains 160 acres in Utah County, Utah.

The land is not needed for any Federal purpose and is not of national significance. Conveyance is consistent with the BLM Pony Express Resource Management Plan—1990, and would be in the public interest. The BLM conducted a Phase II Environmental Site Assessment in November 2014, and no hazardous substances, petroleum products, or recognized environmental conditions were identified on the parcel. An Environmental Assessment (EA) was prepared to analyze Utah County's proposed plan of development and management for the shooting range facility.

The conveyance document, if issued, would be subject to the provisions of the R&PP Act and applicable regulations of the Secretary of the Interior and will contain the following reservations, terms, and conditions:

1. A right-of-way thereon for ditches or canals constructed by authority of the United States pursuant to the Act of August 30, 1890, 43 U.S.C. 945.

2. All minerals shall be reserved to the United States, together with the right to prospect for, mine, and remove the minerals under applicable laws and such regulations as the Secretary of the Interior may prescribe, including all necessary access and exit rights.

3. The purchaser, by accepting the patent, agrees to indemnify, defend, and hold the United States harmless from any costs, damages, claims, causes of action, penalties, fines, liabilities, and judgments of any kind arising from the

past, present, or future acts or omissions of the patentee, its employees, agents, contractors, or lessees, or any third party arising out of, or in connection with, the patentee's use, occupancy or operations on the patented real property. This indemnification and hold-harmless agreement includes, but is not limited to, acts and omissions of the patentee, its employees, agents, contractors, or lessees, or third party arising out of or in connection with the use and/or occupancy of the patented real property resulting in: (1) Violations of Federal, State, and local laws and regulations that are now, or in the future become, applicable to the real property; (2) Judgments, claims, or demands of any kind assessed against the United States; (3) Costs, expenses, or damages of any kind incurred by the United States; (4) Releases or threatened releases of solid or hazardous waste(s) and/or hazardous substances(s), as defined by Federal or State environmental laws, off, on, into, or under land, property, and other interests of the United States; (5) Other activities by which solid or hazardous substances or wastes, as defined by Federal and State environmental laws are generated, released, stored, used, or otherwise disposed of on the patented real property, and any cleanup response, remedial action, or other actions related in any manner to said solid or hazardous substances or wastes; or (6) Natural resource damages as defined by Federal and State law. This covenant will run with the patented real property and may be enforced by the United States in a court of competent jurisdiction.

4. A limited reversionary provision stating that the title shall revert to the United States upon a finding, after notice and opportunity for a hearing, that the patentee has not substantially developed the lands in accordance with the approved plan of development on or before the date 5 years after the date of conveyance. No portion of the land shall under any circumstance revert to the United States if any such portion has been used for solid waste disposal or for any other purpose which may result in the disposal, placement, or release of any hazardous substance.

5. Any other terms or conditions that the Authorized Officer determines appropriate to ensure public access and proper management of the Federal land and interests therein. Detailed information concerning this proposed project, including, but not limited to documentation relating to compliance with applicable environmental and cultural resource laws, is available for

review at the BLM-Salt Lake Field Office at the address above.

On July 14, 2015, the public land described above is segregated from all forms of appropriation under the public land laws, including the general mining laws, except for conveyance under the R&PP Act.

Classification Comments: Interested parties may submit comments involving the suitability of the land for the proposed facility. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future use (or uses) of the land, whether the use is consistent with local planning and zoning, or whether the use is consistent with State and Federal programs.

Application Comments: Interested parties may submit comments regarding the specific use proposed in the application and plan of development and management, and whether the BLM followed proper administrative procedures in reaching the decision to convey under the R&PP Act.

The BLM-Utah State Director will review any adverse comments and may sustain, vacate or modify this realty action. In the absence of any adverse comments, the classification of the land described in this notice will become effective September 14, 2015. The land will not be available for conveyance until after the decision becomes effective.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.
