

Electron Microscope. Manufacturer: FEI Company, the Netherlands. Intended Use: The instrument will be used to understand the structure-property or structure-activity of materials such as catalysts, semiconductors, battery materials, and minerals at high spatial resolution under realistic conditions in order to design better materials. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: June 16, 2015.

Docket Number: 15-034. Applicant: Purdue University, 401 S. Grant St., West Lafayette, IN 47907. Instrument: Diode-Pumped Solid-State Laser. Manufacturer: Edgewave GmbH, Germany. Intended Use: The instrument will be used to enhance the fundamental understanding of propellant combustion so that safer and higher performance solid propellants can be designed and developed. The instrument is to be used for the measurement of flame radical species in propellant flames in real-time, using high-frame-rate (10–40kHz) imaging of the flame radical OH, produced in the reaction zone. The OH distribution is used to determine the burning mode for the propellant, and the laser system will give the capability to obtain high-frame-rate images of other propellants. The primary technique is high-frame-rate planar laser-induced fluorescence (PLIF) imaging. The UV laser from a Credo dye laser, pumped by the Edgewave DPSS laser, is formed into a focused sheet using a combination of spherical and cylindrical lenses. The frequency of the UV beam is then tuned to a resonance transition for the OH radical and the OH radical is pumped from the ground state to an excited electronic state by absorbing a photon from the laser sheet. Once in the excited state, the OH radical can decay by emitting a photon (fluorescence). The fluorescence light is imaged using a high-frame-rate intensified CMOS camera to produce an image of the OH distribution in the laser sheet, providing both time- and space-resolved information on the laser process. No domestic instruments have the required power, rep rate, and pulse length on the order of 10 nanoseconds. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: June 23, 2015.

Dated: July 21, 2015.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE022

Marine Mammals; File No. 19590

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Terrie Williams, Ph.D., University of California at Santa Cruz, Long Marine Lab, Center for Ocean Health, 100 Shaffer Road, Santa Cruz, CA 95060, has applied in due form for a permit to conduct research on captive marine mammals.

DATES: Written, telefaxed, or email comments must be received on or before August 27, 2015.

ADDRESSES: The application and related documents are available for review by selecting “Records Open for Public Comment” from the “Features” box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 19590 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include File No. 19590 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Jennifer Skidmore or Amy Sloan, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

The applicant is requesting a permit to continue activities authorized under Permit No. 13602. This research compares the energetic and cardiovascular responses and diving physiology of odontocetes and pinnipeds to determine key physiological factors. Captive bottlenose dolphins (*Tursiops truncatus*) and temporarily held non-releasable Hawaiian monk seals (*Neomonachus schauinslandi*) at Long Marine Lab will be used as model species due to availability, trainability, and a foundation of data from previous studies by the applicant. Additional captive marine mammal species (up to 132 animals representing 8 species over 6 years, listed in the application) will be added through cooperative agreements with accredited zoological institutions in the U.S. Other species and subjects from rehabilitation and stranding programs in the U.S. may be added opportunistically. This research on captive animals will provide data for understanding the impact of changing environmental demands on wild marine mammals. Two approaches are used, (1) basic physiological evaluation (caloric intake, metabolism, heart rate, stroke rate, aerobic dive capacity, thermal capacity) measured seasonally on mature and immature dolphins, and (2) comparative evaluation of identical parameters for other species representing different marine mammal evolutionary lineages. Research methods include training marine mammals for voluntary participation to the maximum extent feasible to (1) assess body condition and morphometrics, (2) measure metabolic rate (stationing under a metabolic hood), (3) sample blood (for blood gases and lactate concentration) and administer Evan’s blue dye and deuterium oxide (determination of oxygen stores), (4) attach instruments (*e.g.*, ECG monitors to measure heart rate), (5) monitor heat flow and skin temperature with a handheld surface probe, and (6) measure body temperature via a flexible

rectal probe or an ingested stomach temperature pill. The permit is requested for the maximum duration of five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: July 23, 2015.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XD900

Marine Mammals; File No. 18786

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit.

SUMMARY: Notice is hereby given that a permit has been issued to NMFS Office of Protected Resources, Marine Mammal Health and Stranding Response Program (Responsible Party: Teri Rowles, D.V.M., Ph.D.), 1315 East-West Highway, Silver Spring, MD 20910, to take, import, and export marine mammals and marine mammal parts for research and enhancement purposes.

ADDRESSES: The permit and related documents are available for review upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Amy Sloan or Jennifer Skidmore, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On May 1, 2015, notice was published in the **Federal Register** (80 FR 24903) that a request for a permit to conduct research and enhancement on marine mammals had been submitted by the above-named

applicant. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*).

Permit No. 18786 authorizes the MMHSRP to: (1) Carry out response, rescue, rehabilitation and release of threatened and endangered marine mammals under NMFS jurisdiction (Cetacea and Pinnipedia [excluding walrus]), and disentanglement of all marine mammals under NMFS jurisdiction, pursuant to sections 109(h), 112(c), and Title IV of the MMPA; and, carry out such activities as enhancement pursuant to section 10(a)(1)(A) of the ESA; (2) Conduct health-related, bona fide scientific research studies on marine mammals and marine mammal parts under NMFS jurisdiction pursuant to sections 104(c) and Title IV of the MMPA and section 10(a)(1)(A) of the ESA, including research related to emergency response that may involve compromised animals, and research on healthy animals that have not been subject to emergency response (*e.g.*, baseline health studies); (3) Conduct Level B harassment on all marine mammal species under NMFS jurisdiction incidental to MMHSRP activities in the U.S.; and (4) Collect, salvage, receive, possess, transfer, import, export, analyze, and curate marine mammal specimens under NMFS jurisdiction for purposes delineated in numbers (1) and (2) above. The permit expires June 30, 2020.

An environmental assessment (EA) was prepared analyzing the effects of the permitted activities on the human environment in compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Based on the analyses in the EA, NMFS determined that issuance of the permit would not significantly impact the quality of the human environment and that preparation of an environmental impact statement was not required. That determination is documented in a Finding of No Significant Impact (FONSI).

As required by the ESA, issuance of this permit was based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the

purposes and policies set forth in section 2 of the ESA.

Dated: July 9, 2015.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XS81

Marine Mammals; File No. 14296

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit amendment.

SUMMARY: Notice is hereby given that Briana Witteveen, Ph.D., University of Alaska Fairbanks, School of Fisheries and Ocean Sciences, 118 Trident Way, Kodiak, AK 99615, has been issued a minor amendment to Scientific Research Permit No. 14296-01.

ADDRESSES: The amendment and related documents are available for review upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

FOR FURTHER INFORMATION CONTACT: Courtney Smith or Amy Sloan, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The original permit (No. 14296), issued on July 14, 2010 (74 FR 58243) through July 31, 2015 authorized scientific research on cetaceans year-round in the Gulf of Alaska, with an emphasis on examining prey use and foraging patterns of gray (*Eschrichtius robustus*), fin (*Balaenoptera physalus*), humpback (*Megaptera novaengliae*), and killer (*Orcinus orca*) whales and exploring the responses of humpback
