

- Effects on wildlife habitat, plants, and animals including threatened, endangered, and sensitive species (especially sage-grouse)
- Potential effects to JBLM YTC military training operations
- Effects to visual resources and existing view sheds
- Effects to cultural resources
- Effects to soils and water from surface-disturbing activities
- Social and economic effects
- Management and control of invasive plant species
- Public health and safety

The Supplemental Draft EIS analysis identified several advantages associated with the New Northern Route Alternative and they include:

- Reduced overall transmission line length; approximately 22-miles shorter than the DEIS Agency Preferred Alternative. The reduced transmission line length provides reduced resource impacts for several issues compared to the original DEIS Agency Preferred Alternative.

- Reduced overall transmission line length across non-federal lands; The New Northern Route Alternative occurs primarily on federal lands and therefore has less impacts on land use, public health and safety, and other issues compared to the DEIS Agency Preferred Alternative.

- Reduced overall disturbance footprint; the New Northern Route Alternative is consolidated in an existing transmission line corridor (approximately 200-foot centerline-to-centerline separation) for the majority of the proposed routing. The reduced disturbance foot-print thus reduced resource impacts such as impacts to wildlife habitat (especially Sage-Grouse), military training, soils, water resources, invasive species spread, and others issues compared to the DEIS Agency Preferred Alternative.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. Please note that public comments and information submitted, including names, street addresses, and email addresses of persons who submit comments, will be available for public review and disclosure at the above address during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Authority: 40 CFR 1506.6, 40 CFR 1506.10.

Daniel C. Picard,

Spokane District Manager.

Notice of Availability of Additional Information on Proposed Areas of Critical Environmental Concern and Associated Resource Use Limitations Identified in the Draft Eastern Interior Resource Management Plan/Draft Environmental Impact Statement, Alaska

AGENCY: Bureau of Land Management, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: On February 24, 2012, the Bureau of Land Management (BLM) published a Notice of Availability (NOA) of the Eastern Interior Draft Resource Management Plan (RMP)/Environmental Impact Statement (EIS) for public review and comment in the **Federal Register**. BLM planning regulations require the BLM to notify the public of proposed Areas of Critical Environmental Concern (ACEC) and specify the resource use limitations which would occur if the ACECs were formally designated through approval of the Eastern Interior RMP. Based on public comment on the Draft RMP, the BLM proposes the reconfiguration of the Fortymile ACEC and proposes a new ACEC on the Mosquito Flats. These specific proposed ACEC boundaries were not noticed in the Draft RMP/EIS. Thus, the BLM is providing this notice and public comment period for these two proposed ACECs.

DATES: You may submit comments related to the new ACEC information in this notice until March 3, 2014.

ADDRESSES: You may submit comments related to the new ACEC information by any of the following methods:

- Email: easterninterior@blm.gov.
- Fax: 907–474–2282.
- Mail: Eastern Interior Field Office, Attention—Eastern Interior RMP, Bureau of Land Management, 1150 University Avenue, Fairbanks, Alaska 99709.

FOR FURTHER INFORMATION CONTACT:

Jeanie Cole, telephone 907–474–2340 or email j05cole@blm.gov. Persons who use a telecommunications device for the

deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Comments on the Draft RMP/EIS received from the public and internal BLM analyses on ACECs were reviewed and considered for incorporation into the proposed plan. As a result, the BLM now proposes the addition of the 30,000 acre Mosquito Flats ACEC and reconfiguration of the Fortymile ACEC to 685,000 acres. It is unnecessary to issue a supplement to the Draft EIS pursuant to 40 CFR 1502.9 because the proposed land management direction for these ACECs was within the spectrum of alternatives analyzed in the Draft EIS. The following description details the information for these two proposed ACECs. Maps of both ACECs are available on the BLM's Eastern Interior RMP Web site at www.blm.gov/ak/eirmp.

Mosquito Flats ACEC (30,000 Acres)

During the public comment period for the Eastern Interior RMP, the BLM received two nominations for an ACEC on the Mosquito Flats. The proposed Mosquito Flats ACEC is a large wetland complex unique to BLM lands in the planning area; it consists of a wetland basin situated in the upper portion of the drainage, at relatively high elevation (~2250 ft), and surrounded by mountains. Mosquito Flats provides unique wetland and aquatic habitats and supports a variety of wildlife species.

The proposed ACEC is comprised of a complex of floating bog wetland vegetation partially surrounded by mountains. The Mosquito Fork River flows over continuous sand beds that are uncharacteristically clean, light colored, well-sorted, and low in organics. These sand beds provide unique aquatic habitat essential for maintaining diverse species within the planning area.

Mosquito Flats is an important moose calving area and summer habitat for the regional moose population. The area also supports short-eared owls and nesting trumpeter swans, both BLM-Alaska sensitive species. It may also support other BLM-sensitive species, including olive-sided flycatcher, rusty blackbird, and blackpoll warbler.

Proposed Use Limitations: Closed to locatable mineral entry and mineral leasing, subject to valid existing rights. Off-Highway Vehicle (OHV) use is

limited by season with no summer use, except by permit.

Fortymile ACEC (685,000 Acres)

The BLM proposes modifying the boundary of the Fortymile ACEC that was presented in Alternative B in the Draft RMP/EIS to improve manageability by including additional small parcels between the calving/post-calving distribution and the Fortymile National Wild and Scenic River Corridor. The Fortymile ACEC is proposed to maintain effective caribou and Dall sheep habitat and mineral licks. The Fortymile caribou herd is an important subsistence resource in interior Alaska and calving and postcalving habitats are considered the most sensitive seasonal habitats.

Proposed Use Limitations: Closed to locatable mineral entry and mineral leasing, subject to valid existing rights. Limited OHV designation: Seasonal limitation on uses within 1 mile of mineral licks.

Consistent with 43 CFR 1610.7–2, the BLM is providing this notice and public comment period for these two proposed ACECs. (Supplemental information can be found in the original Notice of Availability (NOA) published in the **Federal Register** and on the Eastern Interior RMP Web site at www.blm.gov/ak/eirmp).

You may submit comments related to the new ACEC information on this notice until March 3, 2014 using any of the methods listed in the **DATES** section above.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Bud C. Cribley,
State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2014–0077]

Extension of Comment Period on the Environmental Assessment for Virginia Offshore Wind Technology Advancement Project on the Atlantic Outer Continental Shelf Offshore Virginia

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Extension of comment period.

SUMMARY: BOEM is extending the comment period on an Environmental Assessment (EA) that considers the reasonably foreseeable environmental consequences associated with approval of wind energy-related research activities offshore Virginia as proposed by the Virginia Department of Mines, Minerals and Energy (DMME). BOEM is seeking public input on the EA, including comments on the completeness and adequacy of the environmental analysis. BOEM will consider public comments on the EA in determining whether to issue a Finding of No Significant Impact (FONSI), or conduct additional analysis under the National Environmental Policy Act.

DATES: Comments on the EA will now be accepted until January 16, 2015.

FOR FURTHER INFORMATION CONTACT: Michelle Morin, BOEM Office of Renewable Energy Programs, 381 Elden Street, HM 1328, Herndon, Virginia 20170, (703) 787–1340 or Michelle.Morin@boem.gov.

SUPPLEMENTARY INFORMATION: Please refer to the notice published in the **Federal Register** (79 FR 71446) on December 2, 2014, for further information. The notice and the EA can be found at: <http://www.boem.gov/VOWTAP/>.

Comments: You may submit your comments by one of two methods:

1. Electronically: <http://www.regulations.gov>. In the entry entitled, “Enter Keyword or ID,” enter BOEM–2014–0077, and then click “search.” Follow the instructions to submit public comments and view supporting and related materials for this notice.

2. In written form, delivered by hand or by mail, enclosed in an envelope labeled “Approval of the Virginia Offshore Wind Technology Advancement Project on the Atlantic Outer Continental Shelf (OCS) Offshore Virginia” to: Program Manager, Office of Renewable Energy, Bureau of Ocean Energy Management, 381 Elden Street,

HM 1328, Herndon, Virginia 20170–4817. Comments must be received or postmarked no later than January 16, 2015. All written comments received or postmarked during the comment period will be made available to the public. Comments already submitted in response to the December 2, 2014, notice do not need to be resubmitted.

Authority: This notice is published pursuant to 43 CFR 46.305.

Dated: December 22, 2014.

Walter D. Cruickshank,
Acting Director, Bureau of Ocean Energy Management.

NATIONAL SCIENCE FOUNDATION

Notice of Permits Issued Under the Antarctic Conservation Act

AGENCY: National Science Foundation.

ACTION: Notice of permits issued Under the Antarctic Conservation of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish notice of permits issued under the Antarctic Conservation Act of 1978. This is the required notice.

FOR FURTHER INFORMATION CONTACT: Li Ling Hamady, ACA Permit Officer, Division of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Or by email: ACApermits@nsf.gov.

SUPPLEMENTARY INFORMATION: On November 25, 2014 the National Science Foundation published a notice in the **Federal Register** of a permit application received. The permit was issued on December 25, 2014 to: Ashley Perrin, Permit No. 2015–016.

Nadene G. Kennedy,
Polar Coordination Specialist, Division of Polar Programs.
