address, and the policies and practices for storing, retaining, disposing, and safeguarding of the records, and to add three new sections to the system addressing the notification procedure, record access procedures, and contesting procedures. By using administrative record data from other agencies, the Census Bureau will be able to improve the quality and usefulness of its data, while reducing costs and respondent burden.

This amendment makes the following seven changes to the information provided under the system. The first change updates the categories of records in the system to provide additional information and details surrounding the records including the use of administrative records. The second change updates the authorities for maintenance of the system by specifying which sections of Title 13 of the United States Code (U.S.C.) applies to this system of records. The third change

updates the routine uses of records maintained by the system of records to indicate that the records in this system of records are solely for statistically purposes. The fourth change clarifies the storage of records including those obtained from source datasets. The fifth change updates the system manager and address to reflect that the system of records is being maintained in another program area. The sixth change updates the policies and practices for storing, retaining, disposing, and safeguarding of the records. The last change adds three new sections that address the notification procedure, record access procedures, and contesting procedures, to this system; these section were not included in the last publication of this notice in the **Federal Register** on May 10, 2002 (67 FR 31766).
