Abstract: The Public Water System Supervision (PWSS) Program ICR examines public water systems, primacy agencies (*i.e.*, states and tribes with primary enforcement authority) and tribal operator certification provider

burden, and costs for "cross-cutting" recordkeeping and reporting requirements (*i.e.*, the burden and costs for complying with drinking water information requirements that are not associated with contaminant-specific rulemakings). The following activities have recordkeeping and reporting requirements that are mandatory for compliance with 40 CFR parts 141 and 142: The Consumer Confidence Report Rule (CCR), the Variance and Exemption Rule (V/E Rule), General State Primacy Activities, the Public Notification Rule (PN) and Proficiency Testing Studies for Drinking Water Laboratories. The information collection activities for both the Operator Certification and the Capacity Development Program are driven by the grant withholding and reporting provisions under sections 1419 and 1420, respectively, of the Safe Drinking Water Act. The information collection for the Tribal Operator Certification Program is driven by grant eligibility requirements outlined in the Drinking Water Infrastructure Grant Tribal Set-Aside Program Final Guidelines and the Tribal Drinking Water Operator Certification Program Guidelines.

Form Numbers: None.

Respondents/affected entities: New and existing public water systems and primacy agencies.

Respondent's obligation to respond: Mandatory for compliance with 40 CFR parts 141 and 142.

Estimated number of respondents: 151,724 (total).

Frequency of response: Varies by requirement.

Total estimated burden: 3,769,213 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$187,603,000 (per year), includes \$42,103,000 in operation and maintenance costs.

Changes in the Estimates: There is a decrease of 344,195 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is a result of removing burden associated with variances, exemptions and constructed conveyances to reflect no new activity in these categories; updating relevant baseline information for each rule with the most current and accurate information available (*e.g.*, public water system inventory); and, updating burden to incorporate the results of consultation with stakeholders. Where appropriate and available, estimated violation and other associated rates have

also been updated to reflect current information on rule compliance.

Acting Director, Collection Strategies Division.

Abstract: Respondents are existing facilities and new OSWI units, which include two sub-categories: 1) very small municipal waste combustion (VSMWC) units that combust less than 35 tons per day of waste; and 2) institutional waste incineration (IWI) units. These standards apply to any air quality program in a state or United States protectorate with one or more existing other solid waste incineration (OSWI) units or air curtain incinerators that commenced construction on or before December 9, 2004. This subpart does not directly affect incineration unit owners and operators; however, they must comply with the state's plan that was developed by the air quality program administrator to implement the emission guidelines.

Form Numbers: None.

Respondents/affected entities: OSWI units, which include two subcategories: VSMWC units that combust less than 35 tons per day of waste and IWI units.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart FFFF).

Estimated number of respondents: 99 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 70,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$7,560,000 (per year), including \$495,000 in either annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the total estimated labor burden as currently identified in the OMB Inventory of Approved Burdens. This not due to any program changes. The increase occurred because we assume existing respondents will take some time to re-familiarize themselves with the rule each year. In addition, the cost estimate has been updated using more current labor rates.
