This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is

soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) Recruitment for 2017 Operational Field Test*OMB Control Number:* 1850–0911.*Type of Review:* A revision of an existing information collection.*Respondents/Affected Public:* Individuals.*Total Estimated Number of Annual Responses:* 21,232.*Total Estimated Number of Annual Burden Hours:* 6,947.*Abstract:* The Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) is the first study sponsored by the National Center for Education Statistics (NCES), within the Institute of Education Sciences (IES) of the U.S. Department of Education (ED), to follow a nationally-representative sample of students as they enter and move through the middle grades (grades 6–8). The data collected through repeated measures of key constructs will provide a rich descriptive picture of the academic experiences and development of students during these critical years and will allow researchers to examine associations between contextual factors and student outcomes. The study will focus on student achievement in mathematics and literacy along with measures of student socioemotional wellbeing and other outcomes. The study will also include a special sample of students with different types of disabilities that will provide descriptive information on their outcomes, educational experiences, and special education services. Baseline data for the MGLS:2017 will be collected from a nationally-representative sample of 6th grade students beginning in January 2018, with annual follow-ups beginning in January 2019 and in January 2020 when most of the students in the sample will be in grades 7 and 8, respectively. This request is to contact and recruit

public school districts and public and private schools, beginning in January 2016, to participate in the MGLS:2017 Operational Field Test (OFT) which will take place from January to June 2017. The primary purpose of the OFT is to obtain information on recruiting, particularly for the targeted disability groups; obtaining a tracking sample that can be used to study mobility patterns in subsequent years; and testing protocols and administrative procedures. The OFT will inform the materials and procedures for the main study base year and follow-up data collections. The base year data collection will begin in January 2018. Because the MGLS:2017 Item Validation Field Test (IVFT) recruitment and data collection will still be ongoing at the time this request is approved, the burden and materials from the MGLS:2017 Recruitment for 2016 IVFT request (OMB# 1850–0911 v.3, 5, and 7) and from the MGLS:2017 IVFT Data Collection (OMB# 1850–0911 v.4) are being carried over in this submission.

Total Estimated Number of Annual Burden Hours: 8,848.

Abstract: The E-Government Act (Pub. L. 107-347) passed by the 107th Congress and signed into law by the

President in December 2002 recognized the importance of information security to the economic and national security interests of the United States. Title III of the E-Government Act, entitled the Federal Information Security Management Act (FISMA) requires each federal agency to develop, document, and implement an agency-wide program to provide information security for the information and information systems that support the operations and assets of the agency, including those provided or managed by another agency, contractor, or other source. FISMA, along with the Paperwork Reduction Act of 1995 and the Information Technology Management Reform Act of 1996 (Clinger-Cohen Act), explicitly emphasizes a risk-based policy for cost-effective security.

FSA is initiating a formal assessment program of the Guaranty Agencies that will ensure the continued confidentiality and integrity of data entrusted to FSA by students and families. The assessment will identify security deficiencies based on the Federal standards described in the National Institute of Standards and Technology (NIST) publications. The comprehensive self-assessment links all questions with a NIST control. This collection of information impacts 28 independently owned Guaranty Agencies (GAs) dispersed throughout the U.S. Each agency is under signed agreement with the Department of Education to service Federal Family Education Loans that have been turned over from the lending institutions to the GAs for the purpose of student loan collections.
