

Schedule A (Summary)—Revisions to Schedule A.7.c (PPNR Metrics)

In order to fully align the schedule with the stress scenarios, the beta information would be collected according to the scenario instead of the current “normal environment” requirement, effective for the 2016 DFAST submission.

Counterparty Credit Risk Schedule

This schedule would be removed to reduce reporting burden effective for the 2016 DFAST submission. Aggregate counterparty credit risk information will continue to be obtained through the Summary Schedule (Schedule A).

Scenario Schedule

Information about additional scenarios that are used by covered institutions is currently submitted in a format with limited structure, which makes it difficult for the OCC to evaluate. As such, the OCC would require that covered institutions provide three more historical quarters in addition to the currently required most recent historical quarter of actual data values for each additional variable submitted. The OCC would also provide additional instructions on variable naming conventions and other appropriate standardizations in order to facilitate more streamlined electronic processing of the data.

Type of Review: Revision.

Affected Public: Businesses or other for-profit.

Estimated Number of Respondents: 23.

Estimated Total Annual Burden: 16,466 hours.

The OCC believes that the systems covered institutions use to prepare the FR Y-14 reporting templates to submit to the Board will also be used to prepare the reporting templates described in this notice. Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC’s estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection

techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Background

The Kingpin Act became law on December 3, 1999. The Kingpin Act establishes a program targeting the activities of significant foreign narcotics traffickers and their organizations on a worldwide basis. It provides a statutory framework for the imposition of sanctions against significant foreign narcotics traffickers and their organizations on a worldwide basis, with the objective of denying their businesses and agents access to the U.S. financial system and the benefits of trade and transactions involving U.S. companies and individuals.

The Kingpin Act blocks all property and interests in property, subject to U.S. jurisdiction, owned or controlled by significant foreign narcotics traffickers as identified by the President. In addition, the Secretary of the Treasury, in consultation with the Attorney General, the Director of the Central Intelligence Agency, the Director of the Federal Bureau of Investigation, the Administrator of the Drug Enforcement

Administration, the Secretary of Defense, the Secretary of State, and the Secretary of Homeland Security, may designate and block the property and interests in property, subject to U.S. jurisdiction, of persons who are found to be: (1) Materially assisting in, or providing financial or technological support for or to, or providing goods or services in support of, the international narcotics trafficking activities of a person designated pursuant to the Kingpin Act; (2) owned, controlled, or directed by, or acting for or on behalf of, a person designated pursuant to the Kingpin Act; or (3) playing a significant role in international narcotics trafficking.
