SUPPLEMENTARY INFORMATION: The Copper Flat Copper Mine is the proposed reestablishment of a polymetallic mine and processing facility located near Hillsboro, New Mexico, that would produce copper, gold, silver, and molybdenum. The Proposed Action is to approve the Project as proposed, consisting of an open pit mine, flotation mill, tailings impoundment, waste rock disposal areas, a low-grade ore stockpile, and ancillary facilities. In most respects, the facilities, disturbance, and operations would be similar to the former operation. The Project is owned and operated by the New Mexico Copper Corporation (Copper Corporation), a wholly owned subsidiary of THEMAC

Resources Group Limited. The Project is comprised of 963 acres (841 acres of proposed disturbance and 122 acres undisturbed) of private land and 1,227 acres (745 acres of proposed disturbance and 482 acres undisturbed) of public land, for a total of 2,190 acres. The proposed mining plan of operations was submitted by the Copper Corporation to the BLM in June 2011 and is based upon the plan of development that Quintana Mineral Corporation used in the previous operation of Copper Flat mining activities in 1982. The Project includes upgrades and modifications based on current engineering designs and regulations and was intentionally developed to re-use the existing foundations, production wells, and water pipeline that were employed by the previous Quintana operation. Four Alternatives are analyzed: No Action, Proposed Action, Alternative A, and Alternative B. The Preferred Alternative (Alternative B) is different than the Proposed Action in that ore would be processed at a faster rate, therefore shortening the mine life of the Project.

Under the Proposed Action, the BLM would approve the Copper Corporation's plan to process 17,500 tons per day of copper ore over a mine operations period of 16 years, resulting in 100 million tons of ore processed over the mine life. Alternative A would process 25,000 tons per day of copper ore over a mine operations period of 11 years, resulting in 103 million tons of ore processed over the mine life. Alternative B would process 30,000 tons per day of copper ore over a mine operations period of 12 years, resulting in 125 million tons of ore processed over the mine life.

Mitigation of impacts are proposed in the mining plan of operations for reducing water quality effects; reducing the effects of the spread of nonnative vegetation and noxious weeds; providing protection to special-status bird species; pre-development surveying for bat species; developing measures to avoid, minimize, or mitigate the adverse effects to historic properties; reducing adverse impacts on historic properties; informational signing for mining as a resource to reduce visual impacts; fencing to prevent injury or loss of livestock from mining operations; reducing "boom and bust" socioeconomic impacts; reducing public concerns about potential company bankruptcy; and reducing effects to environmental justice populations.

The scoping period began on January 9, 2012, and ended on March 9, 2012. Scoping meetings were held in Hillsboro and Truth or Consequences, New Mexico, on February 22 and 23,

2012, respectively. During the open house portion of the meeting, the public had opportunities to speak with representatives of the BLM, the State of New Mexico, and the Copper Corporation. Several display stations were featured with exhibits, maps, fact sheets, and other informational materials. The key issues identified from public scoping focused on water, biological resources, traffic, and social and economic concerns.

The BLM has prepared the Draft EIS in conjunction with its four Cooperating Agencies: The New Mexico Department of Game and Fish, New Mexico Environment Department, New Mexico Energy, Minerals and Natural Resources Department, and New Mexico Office of the State Engineer.
