

POLICY JUSTIFICATION*United Kingdom—Hellfire Missiles*

The Government of the United Kingdom (UK) requested a possible sale of five hundred (500) AGM-114R Hellfire II Semi-Active Laser (SAL) Missiles. The estimated cost is \$80 million.

This sale directly contributes to the foreign and national security policies of the United States by enhancing the close air support capability of the UK in support of NATO and other coalition operations. Commonality between close air support capabilities greatly increases interoperability between our two countries' military and peacekeeping forces and allows for greater burden sharing.

The proposed sale improves the UK's ability to meet current and future threats by providing close air support to counter enemy attacks on coalition ground forces in U.S. CENTCOM's area of responsibility. The UK currently has Hellfire missiles in its inventory and will have no difficulty absorbing these additional missiles.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

There is no principal contractor for this sale as the missiles are coming from U.S. Army stock. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the UK.

There will be no adverse impact on United States defense readiness as a result of this proposed sale. All defense articles and services are approved for release by our foreign disclosure office.

Transmittal No. 15-76

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex—Item No. vii

(viii) *Sensitivity of Technology:*

1. *AGM-114R Hellfire.* The AGM-114R Hellfire II Semi-Active Laser (SAL) Missiles are rail-launched guided missiles developed and produced by Lockheed Martin. The weapon system hardware, as an "All Up Round," is UNCLASSIFIED. The highest level of

classified information to be disclosed regarding the AGM-114R Hellfire II missile software is SECRET. The highest level of classified information that could be disclosed by a proposed sale or by testing of the end item is SECRET and the highest level that must be disclosed for production, maintenance, or training is CONFIDENTIAL. Software sensitivity is primarily in the programs that instruct the system on how to operate in the presence of countermeasures.

2. If a technologically advanced adversary obtained knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that the UK can provide substantially the same degree of protection for the AGM-114R Hellfire II missiles as the United States Government. Transfer of these missiles to the UK is necessary in the furtherance of United States foreign policy and national security objectives.

4. All defense articles and services listed in this transmittal are authorized for release and export to the Government of the United Kingdom.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Lithuania—M 1126 Stryker Infantry Carrier Vehicles (ICV) with 30mm cannon and M2 Machine Guns, and Related Support Equipment

The Government of Lithuania has requested a sale of eighty-four (84) M 1126 Stryker Infantry Carrier Vehicles (ICV) with the ATK 30mm cannon, the XM813 30mm cannon or a European variant with the Remote Weapon Station and eighty-four (84) M2 Flex Machine Guns. Additionally, they have requested the ICV-30 package, including contractor logistics support, support equipment, spare parts, armaments, two (2) AN/PRC-152 Radios per vehicle, one (1) AN/PSN-13 DAGR per vehicle, one (1) VIC-3 per vehicle, training aids/devices/simulators & simulations (TADSS), translated technical manuals with laptop computers, training, Foreign Service Representatives (FSRs), OCONUS Contractor vehicle deprocessing services and technical assistance. The total estimated value of MDE is \$462 million. The overall total estimated value is \$599 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally.

Lithuania's acquisition of the Stryker ICV system would represent a major advancement in capability for the Lithuanian Land Forces, filling a vital capability gap that is not currently addressed. The Stryker ICV system would provide maneuverability, speed, and firepower to the Lithuanian Land Forces and enhance Lithuania's ability to contribute to territorial defense and NATO and coalition operations. Lithuania will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor is unknown at this time. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require up to 30 U.S. Government or contractor representatives to travel to Lithuania. It is estimated that it will take up to 30 personnel to execute the managing, fielding, training, initial establishment of spare storage and maintenance facilities, and the execution of maintenance over a two-year period, beginning with the first fielding of vehicles.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-78

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

Annex Item—No. vii

(vii) Sensitivity of Technology:

1. The following Major Defense Equipment items do not contain any sensitive technologies or classified material: 84 M1 126 Stryker Infantry Carrier Vehicles (ICV) with the ATK 30mm cannon, the XM813 30mm cannon or a European variant with Remote Weapons Station and M2 Flex Machine Guns.

2. The following Non-Major Defense Equipment items that contain sensitive technologies, but no classified material: Support equipment (COMSEC radios and GPS DAGRS). Lithuania is cleared to receive these items. The following Non-Major Defense Equipment items do not contain any sensitive technologies or classified material: Contractor Logistics Support, spare parts, Armaments, Command and Control Communications Computers Intelligence Surveillance and Reconnaissance, Training Aids/Devices/Simulators & Simulations (TADSS), translated technical manuals with laptop computers, training, Foreign Service Representatives, Outside Continental United States Contractor vehicle deprocessing services, and Technical Assistance.

3. A determination has been made that the recipient country can provide the same degree of protection for the sensitive technology being released as the U.S. Government.

4. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification. Moreover, the benefits derived from this sale, as outlined in the Policy Justification, outweigh the potential damage that could result is the sensitive technology were revealed to unauthorized persons.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Lithuania.
