

General Description: Among other things, the Federal Deposit Insurance Act (FDIA) sets forth the duties and responsibilities of the FDIC in providing for and maintaining a system of deposit insurance for the nation's insured depository institutions and in resolving troubled insured depository institutions in a manner that presents the least cost to the Deposit Insurance Fund. Section 6 of the FDIA sets forth a number of factors to be considered before an institution is permitted by the FDIC to obtain federal deposit insurance. Among these factors are the financial history of the institution; the adequacy of the institution's capital structure; the further earnings prospects; the convenience and needs of the community; the institution's corporate powers, and, not insignificantly, the risk presented to the Deposit Insurance Fund. (Similarly, provisions of the Change in Bank Control Act, found in section 7 of the FDIA, permit the FDIC—or another appropriate federal banking agency—to refuse to permit a proposed change in bank control if the proposed transaction would result in an adverse effect on the Deposit Insurance Fund.) Section 8 of the FDIA authorizes the FDIC to assess the safety and soundness of the practices, operations, and conditions of insured depository institutions, and permits the FDIC to terminate deposit insurance or to take other appropriate actions if the institution operates in an unsafe and unsound manner. Finally, section 13 of the FDIA authorizes the FDIC to resolve troubled insured depository institutions and to dispose of the assets of such institutions using the method that is least costly to the Deposit Insurance Fund, maximizes the return from the sale of such assets, and minimizes any loss to the Deposit Insurance Fund.

The FDIC's policy statement on Qualifications for Failed Bank Acquisitions provides guidance to private capital investors interested in acquiring or investing in failed insured depository institutions regarding the terms and conditions for such investments or acquisitions. The information collected pursuant to the policy statement allows the FDIC to evaluate, among other things, whether such investors (and their related interests) could negatively impact the Deposit Insurance Fund, increase resolution costs, or operate in a manner that conflict with statutory safety and soundness principles and compliance requirements.

A. Purpose

FAR 31.205-46, Travel Costs, requires that, except in extraordinary and temporary situations, costs incurred by a contractor for lodging, meals, and incidental expenses shall be considered to be reasonable and allowable only to the extent that they do not exceed on a daily basis the per diem rates in effect as of the time of travel.

These requirements are set forth in the Federal Travel Regulation for travel in the conterminous 48 United States; in the Joint Travel Regulation for travel in Alaska, Hawaii, the Commonwealth of Puerto Rico, and territories and possessions of the United States; and in the Department of State Standardized Regulations, section 925, "Maximum Travel Per Diem Allowances for Foreign Areas." The burden generated by this coverage is in the form of the contractor preparing a justification whenever a higher actual expense reimbursement method is used. A notice was published in the **Federal Register** at 81 FR 13368 on March 14, 2016.

B. Discussion and Analysis

One respondent submitted public comments on the extension of the previously approved information collection.

Comment on the policy: The respondent expressed support for the requirement that Federal contractors justify any methods that result in reimbursements exceeding the per diem rates. The respondent stated that FAR 31.205 applies the same standard to Federal employees; the burden is fairly imposed upon contractors.

Response: The Government appreciates and acknowledges the comment.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can
