SUPPLEMENTARY INFORMATION:

Background

A Candidate Conservation Agreement with Assurances is an agreement with the Service in which private and other non-Federal landowners voluntarily agree to undertake management activities and conservation efforts on their properties to enhance, restore, or maintain habitat to benefit species that are proposed for listing under the Act, that are candidates for listing, or that may become candidates. The Service and several State, Federal, and local partners developed the Umbrella CCAA (available at <http://www.fws.gov/wyominges>) to provide Wyoming ranchers with the opportunity to voluntarily conserve greater sage-grouse and its habitat while carrying out their ranching activities. The Umbrella CCAA was made available for public review and comment on February 7, 2013 (see 78 FR 9066), and was executed by the Service on November 8, 2013.

Pursuant to the Umbrella CCAA, ranchers in Wyoming may apply for an EOS permit under the Act by agreeing to implement certain conservation measures for the greater sage-grouse on their properties. These conservation measures are specified in individual CCAAs for their properties, which are developed in accordance with the Umbrella CCAA and are subject to the terms and conditions stated in that agreement. Landowners consult with the Service and other participating agencies to develop an individual CCAA for their property, and submit it to the Service for approval with their EOS permit application. If we approve the individual CCAA and EOS permit application, we will issue an EOS permit, under section 10(a)(1)(A) of the Act (16 U.S.C. 1531 *et seq.*), that authorizes incidental take of greater sage-grouse that results from activities covered by the individual CCAA, should the species become listed. Through the Umbrella CCAA and the individual CCAA and EOS permit, we also provide assurances to participating landowners that, if the greater sage-grouse is listed, and so long as they are

properly implementing their individual CCAA, we will not require any conservation measures with respect to greater sage-grouse in addition to those provided in the individual CCAA or impose additional land, water, or financial commitments or restrictions on land, water, or resource use in connection with the species. The EOS permit would become effective on the effective date of listing of the greater sage-grouse as endangered or threatened, and would continue through the end of the individual CCAA's 20-year term. Regulatory requirements and issuance criteria for EOS permits through a CCAA are found in 50 CFR 17.22(d) and 17.32(d), as well as 50 CFR part 13.

Applications Available for Review and Comment

We invite local, State, and Federal agencies and the public to comment on the following EOS permit applications. The Umbrella CCAA, as well as the individual CCAAs submitted with the permit applications, are also available for review, subject to the requirements of the Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552). The following applicants request approval of EOS permits for the greater sage-grouse, pursuant to the Umbrella CCAA, for the purpose of enhancing the species' survival.
