

Service Type: Telephone Switchboard Operations Service.

Mandatory for: Barksdale Air Force Base, Shreveport, LA.

Mandatory Source(s) of Supply: Louisiana Association for the Blind, Shreveport, LA.

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK.

Service Type: Embroidery of USAF Service/ Name Tapes & Emboss of Plastic Name Tags.

Mandatory for: Lackland Air Force Base, TX.

Mandatory Source(s) of Supply: Delaware Division for the Visually Impaired, New Castle, DE.

Contracting Activity: Dept of the Air Force, FA7014 AFDW PK.

Barry S. Lineback,

Director, Business Operations.

Office of the Secretary

Draft Environmental Impact Statement for the East Campus Integration Program, Fort Meade, Maryland

AGENCY: Department of Defense.

ACTION: Notice of availability; notice of public meeting; request for comments.

SUMMARY: The Department of Defense (DoD) announces the availability of the Draft Environmental Impact Statement (EIS) as part of the environmental planning process for the East Campus Integration Program at Fort George G. Meade, Maryland (hereafter referred to as Fort Meade). The DoD proposes to continue to develop operational complex and headquarters space at the National Security Agency's (NSA) East Campus on Fort Meade for use by NSA and the Intelligence Community. The purpose of the Proposed Action is to provide facilities that are fully supportive of the Intelligence Community's function and to continue to integrate the East Campus with the NSA Main Campus. The need for the action is to meet mission requirements, both internally at the NSA and within the Intelligence Community.

This notice announces a 45-day comment period and provides information on how to participate in the public review process. The public comment period for the Draft EIS will officially end 45 days after publication of the Notice of Availability in the **Federal Register**.

DATES: There will be an open house at 4:30 p.m. followed by a public meeting from 5:00 p.m. to 7:00 p.m. on August 3, 2016. The public meeting may end

earlier or later than the stated time depending on the number of persons wishing to speak. All materials that are submitted in response to the Draft EIS should be received by August 22, 2016 to provide sufficient time to be considered in preparation of the Final EIS.

ADDRESSES: Copies of the Draft EIS are available for your review at the Medal of Honor Memorial Library, 4418 Llewellyn Avenue, Fort Meade, MD 20755; the Glen Burnie Regional Library, 1010 Eastway, Glen Burnie, MD 21060; the Odenton Regional Library, 1325 Annapolis Road, Odenton, MD 21113; and the Severn Library, 2624 Annapolis Road, Severn, Maryland 21144. You may also call 301-688-2970 or send an email to ECIPEIS@hdrinc.com to request a copy of the Draft EIS.

The open house and public meeting will be held at the Severn Library, 2624 Annapolis Road, Severn, Maryland 21144. Verbal and written comments will be accepted at the public meeting. You can also submit written comments to "East Campus Integration Program EIS" c/o HDR, 2600 Park Tower Drive, Suite 100, Vienna, VA 22180 or submit by email to ECIPEIS@hdrinc.com.

FOR FURTHER INFORMATION CONTACT: Mr. Jeffrey Williams at 301-688-2970, or email jdwill2@nsa.gov.

SUPPLEMENTARY INFORMATION:

Background: The NSA is a tenant DoD agency on Fort Meade. NSA is a high-technology communications and data processing organization. In order to meet mission requirements, both at the NSA and within the Intelligence Community, continued integration of the East Campus with the NSA Main Campus on Fort Meade through development of office, operational, and headquarters space is needed. In 2010, NSA completed an EIS that addressed development of facilities on the East Campus. The Record of Decision for the 2010 EIS allowed for initiation of construction currently occurring in the southern portion of the East Campus. This East Campus Integration Program Draft EIS addresses build-out of the northern portion of the East Campus and the adjacent 9800 Troop Support Area, and integration of the East Campus with the NSA Main Campus.

Proposed Action and Alternatives: The East Campus Integration Program was initiated to provide a modern office, operational, and headquarters complex to meet the growth requirements of the NSA and Intelligence Community. Development is proposed along the East Campus central core extending through the NSA Main Campus at Fort Meade.

The Proposed Action consists of the construction of approximately 2,880,000 square feet of office, operational, and headquarters space supporting an increase of 7,200 people with the majority from local leases and government-owned buildings to the NSA Main Campus. The program also includes the demolition of approximately 1,900,000 square feet of buildings and infrastructure. Development would include associated infrastructure (e.g., electrical substation, emergency generator capacity providing 121 megawatts of electricity, life-safety generators, building heating systems, utilities, roads, sidewalks, stormwater management facilities, and parking facilities).

Alternatives identified include four options for emergency power generation and various pollution control systems, two options for building heating systems, four options for locations of parking facilities, and acquisition of additional space at two existing, offsite leased locations. Emergency power generation alternatives are generators and combined generators and combustion turbines. Building heating system alternatives are packaged boilers and a hybrid building heating system consisting of packaged boilers and ground source heat pumps. Parking facility alternatives consist of at least three of the following locations: East Campus Parking Structure 2, Bravo parking lot, N8/N9 parking lot, and Building 9817. Use of multi-level parking facilities were considered in lieu of surface parking. In conjunction with some construction and demolition on the East Campus, lease of space outside of Fort Meade at National Business Park and Annapolis Junction Business Park (Alternatives 1 and 2, respectively) were considered. The No Action Alternative (not undertaking the East Campus Integration Program) is also analyzed in detail.

Summary of Environmental Impacts: The level of environmental impacts potentially resulting from the Proposed Action and alternatives would primarily be dependent on the alternative ultimately selected. Environmental impacts would generally be slightly more adverse for the Proposed Action than for Alternatives 1 and 2 due to the larger building footprints and number of additional personnel associated with the Proposed Action, although facilities and personnel would be consolidated in one location under the Proposed Action.

Generally, construction and demolition would result in some ground disturbance and increased traffic congestion at intersections near the installation and proximal to the build

sites, which would be expected regardless of the alternative selected. Operation of the East Campus Integration Program would be expected to result in long-term, negligible to moderate impacts on land use, noise, air quality, geological resources, water resources, biological resources, infrastructure, sustainability, hazardous materials and waste, and socioeconomic resources. Major impacts on transportation (levels of service) would occur during operation; however, traffic impacts are considered major under the existing conditions as levels of service are already degraded.

Best Management Practices and Mitigation Measures: The Proposed Action has the potential to result in adverse environmental impacts. The Proposed Action includes best management practices, mitigation measures, and design concepts to avoid adverse impacts to the extent practicable. Unavoidable impacts would be minimized or compensated for to the extent practicable. In accordance with Council on Environmental Quality regulations, mitigation measures are considered for adverse environmental impacts.

Copies of the Draft EIS are available for public review at local repositories and by request (see **ADDRESSES**). The DoD invites public and agency input on the Draft EIS. Please submit comments and materials during the 45-day public review period to allow sufficient time for consideration in development of the Final EIS (see **DATES**).

The DoD will consider all comments received and then prepare the Final EIS. As with the Draft EIS, DoD will announce the availability of the Final EIS and once again give you an opportunity for review and comment.

Dated: July 5, 2016.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Intent To Prepare an Integrated Feasibility/Environmental Impact Statement for the Proposed Tinian Harbor Modifications Project, Island of Tinian, Commonwealth of the Northern Mariana Islands

AGENCY: Department of the Army, U.S. Army Corps of Engineers (USACE), DoD.

ACTION: Notice of Intent.

SUMMARY: Pursuant to the section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969; the U.S. Army Corps of Engineers and the Commonwealth of the Northern Mariana Islands (CNMI), Municipality of Tinian (Municipality)/Commonwealth Ports Authority (CPA) gives notice that an Integrated Feasibility/Environmental Impact Statement (F/EIS) is being prepared for the Proposed Tinian Harbor Modifications Project, Island of Tinian, CNMI. This project is authorized under section 209 of the Rivers and Harbors Act of 1962 (Pub. L. 87-874) and will consider the implementation of navigation improvements at Tinian Harbor.

DATES: In order to be considered in the Draft F/EIS, comments and suggestions should be received within 30 days after the last public scoping meeting. Two public scoping meetings will be held in Saipan and Tinian in mid/late July 2016. A separate notice will be published for meeting times and places.

ADDRESSES: Mail written comments concerning this notice to: Mr. Milton Yoshimoto, Project Manager, Civil and Public Works Branch, Honolulu District, U.S. Army Corps of Engineers, Civil and Public Works Branch, Bldg 230, Fort Shafter, Hawaii 96858. Comment letters should include the commenter's physical mailing address and the project title in the subject line.

FOR FURTHER INFORMATION CONTACT: Mr. Milton Yoshimoto, Civil and Public Works Branch, Honolulu District, U.S. Army Corps of Engineers, Bldg 230, Fort Shafter, Hawaii 96858, (808) 835-4034, Email: milton.t.yoshimoto@usace.army.mil.

SUPPLEMENTARY INFORMATION: In accordance with NEPA, the Corps intends to prepare an F/EIS report. The primary Federal actions under consideration are: (1) Navigation improvement measures that expand the turning basin; (2) surge reduction measures by constructing protective structures at both harbors; and (3) dredging harbor sediments to allow larger vessels access to the harbor. The F/EIS reports shall meet the requirements of NEPA, including all applicable federal regulations implementing those statutes.

Evaluation will examine the costs and benefits of this project, as well as the environmental impacts of modifying the maintained dimensions of the existing harbor. The purpose of this effort is to conduct a study to assess the technical, environmental and economic feasibility

in the implementation of navigation improvement at Tinian Harbor.

Project Site and Background

Information: Tinian Harbor is the sole commercial harbor servicing the island of Tinian, CNMI and is owned and maintained by the CPA. Due to its isolation, the harbor is extremely important for the continual flow and transit of goods and materials for the small island community. The CNMI is threatened annually by typhoons and tropical storms which has resulted in the deterioration of the protective breakwater and harbor facilities. Failure of the breakwater would result in complete closure of the harbor, requiring costly air transport as the only remaining option to deliver essential commodities to the island. The project will focus on the repair/reconfiguration of the breakwater and an incremental analysis of the harbor depth to assure safe and efficient operation of commercial vessels.

Proposed Action(s): The study reports will assess the technical, environmental and economic feasibility in the implementation of navigation improvement. These include: (1) Navigation improvement measures that expand the federal turning basin; (2) surge reduction measures by constructing protective structures; and (3) expand and deepen the harbor basin and entrance channel to accommodate larger vessels by dredging.

Issues: Potentially significant issues associated with the project may include: aesthetics/visual impacts, air quality emissions, biological resource impacts, environmental justice, hazards and hazardous materials, hydrology and water quality, noise, traffic and transportation, and cumulative impacts from past, present, and reasonably foreseeable future projects.

Scoping Process: The U.S. Army Corps of Engineers is seeking participation and input of all interested federal, state, and local agencies, Native American groups, and other concerned private organizations or individuals on the scope of the F/EIS through this public notice. The purpose of the public scoping meeting is to solicit comments regarding the potential impacts, environmental issues, and alternatives associated with the proposed action to be considered in the study report. The meeting place, date, and time will be advertised in advance in local newspapers, and meeting announcement letters will be sent to interested parties. The draft F/EIS is expected to be available for public review and comment in the summer of 2017 and a public meeting will be held after its publication.
