IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile; or (3) by hard copy. All comments, attachments, and other material must identify the Agency name and the OSHA docket number (Docket No. OSHA–2010–0018) for this ICR. You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the Agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693–2350, (TTY) (877) 889–5627).

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as their social security number and date of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download from this Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> Web site to submit comments and access the docket is available at the Web site's "User Tips" link. Contact the OSHA Docket Office for information about materials not available from the Web site, and for assistance in using the Internet to locate docket submissions.

BILLING CODE 4510–26–P

NUCLEAR REGULATORY COMMISSION

[Docket 40–9092; NRC–2013–0164]

Reno Creek in Situ Uranium Recovery Project in Campbell County, Wyoming

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft supplemental environmental impact statement; extension of comment period.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) requested public comments on draft Supplement 6 to NUREG–1910, "Generic Environmental Impact Statement for *In Situ* Leach Uranium Milling Facilities." The public comment period was originally scheduled to close on August 22, 2016. The NRC has decided to extend the public comment period to allow more time for members of the public to develop and submit their comments.

DATES: The due date for comments in the document published on July 7, 2016 (81 FR 44333) is extended. Comments should be filed no later than September 6, 2016. Comments received after this date will be considered, if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods:

- Federal Rulemaking Web site: Go to <http://www.regulations.gov> and search for Docket ID NRC–2013–0164. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: Carol.Gallagher@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- Mail comments to: Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see "Obtaining Information and Submitting Comments" in the

SUPPLEMENTARY INFORMATION section of this document.

II. Discussion

The NRC's mission is to license and regulate the Nation's civilian use of radioactive materials to protect public health and safety, promote the common defense and security, and protect the environment. As the NRC prepares to review and regulate a new generation of non-LWRs, a vision and strategy has been developed to assure the NRC's readiness to efficiently and effectively conduct its mission for these technologies. The NRC has prepared a draft document to guide these mission readiness preparations and is now seeking comments from the public so that the agency may benefit from a wide range of stakeholder input as the non-LWR vision and strategy is finalized.

The domestic and international non-LWR industries have changed significantly since the last U.S. commercial non-LWR was shut down in 1989 (Fort St. Vrain, a high-temperature gas-cooled reactor). The NRC now operates in an environment where potential non-LWR applicants have a wide and varied range of technical, business, and regulatory experience. Additionally, the non-LWR industry has become globalized, and commercial non-LWR plants are being designed, constructed, and operated abroad. This international activity provides opportunities for information exchanges between the NRC and its international counterparts about non-LWR operating experience, international codes and standards, and computer modeling techniques and programs.

The NRC could review and license a non-LWR design today, if needed. The agency needs to be effective and efficient as it conducts its safety,
