

based alternatives to ocean dumping; and the adverse effects of the dumping on other uses of the ocean. The Ocean Dumping Criteria are codified in 40 CFR parts 227–228. To meet U.S. reporting obligation under the London Convention, EPA also reports some of this information in the annual United States Ocean Dumping Report.

EPA uses ocean dumping information to make decisions regarding whether to issue or deny a permit. This information is also used to develop the conditions in ocean dumping permits issued by EPA in order to ensure consistency with the Ocean Dumping Criteria. EPA uses monitoring and reporting data from permittees to assess compliance with ocean dumping permits, including associated monitoring activities.

Form numbers: None.

Respondents/affected entities:

Respondents/affected entities may include any private person or entity, or State, local or foreign governments.

Respondent's obligation to respond:

Required to obtain or retain a benefit, specifically permit authorization and/or compliance with permits required under MPRSA sections 102 and 104, 33 U.S.C. 1402 & 1404, and implementing regulations at 40 CFR parts 220–229.

Estimated number of respondents: 2,767 respondents per year.

Frequency of response: The frequency of response varies for application and reporting requirements for different permits. Other than the general permit for transportation and disposal of vessels, response is required once for each permit application, whether a single notification to EPA or a permit application. Depending on the type of MPRSA permit, a permit application would be required prior to expiration if the permittee seeks re-issuance: General permit (once every seven years); special permit (once every three years), and research permit (once every 18 months).

Total estimated burden: The public reporting and recordkeeping burdens for this collection of information are estimated to be 3,207 hours per year. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: Annual labor costs are estimated to be \$153,300 and \$195,857 for capital or operation & maintenance costs.

Changes in estimates: EPA estimates an increase in the number of respondents from 21 to 2,767 with a corresponding decrease in total estimated burden from 27,004 to 3,207 hours as compared to the most recently approved ICR, which expired January 31, 1992. The estimated increase in the number of respondents is due to the significant increase in the number of entities using the burial at sea and

vessel general permits, which were not widely used at the time of the earlier ICR. The estimated decrease in the total estimated burden is due to the implementation of the Ocean Dumping Ban Act of 1988, which led to the cessation of the dumping of sewage sludge and industrial wastes. The respondent burden for these special permits was high due the potentially significant impacts from dumping these wastes, and the data required from the respondents to ensure permit compliance.

Estimated Time per Response: 0.5-8 hours.

Frequency of Response: On occasion reporting requirements; recordkeeping; third party disclosure.

Total Annual Burden: 575,840 hours.

Total Annual Cost: No cost.

Needs and Uses: Section 251 of the Communications Act of 1934, as amended, 47 U.S.C. 251, is designed to accelerate private sector development and deployment of telecommunications technologies and services by spurring competition. Section 222(e) is also designed to spur competition by prescribing requirements for the sharing of subscriber list information. These OMB collections are designed to help implement certain provisions of sections 222(e) and 251, and to eliminate operational barriers to competition in the telecommunications services market. Specifically, these OMB collections will be used to implement (1) local exchange carriers' ("LECs") obligations to provide their competitors with dialing parity and non-discriminatory access to certain services and functionalities; (2) incumbent local exchange carriers' ("ILECs") duty to make network information disclosures; and (3) numbering administration. The Commission estimates that the total annual burden of the entire collection, as revised, is 575,840 hours. This revision relates to a change in one of many components of the currently approved collection—specifically, certain reporting, recordkeeping and/or third party disclosure requirements under section 251(c)(5). In August 2015, the Commission adopted new rules concerning certain information collection requirements implemented under section 251(c)(5) of the Act, pertaining to network change disclosures. The changes to those rules apply specifically to a certain subset of network change disclosures, namely
