

action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a stationary safety zone lasting approximately 48 hours and a moving safety zone lasting approximately one hour that would prohibit transit within 500 feet of the two barges and assist vessels carrying the bridge span. Normally such actions are categorically excluded from further review under paragraph 34(g) of Figure 2–1 of Commandant Instruction M16475.1D. A preliminary environmental analysis checklist is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.
