

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2015–0248 at <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Kelly Sheckler of the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW., Atlanta, Georgia 30303–8960. Mrs. Sheckler can be reached by telephone at (404) 562–9222 or via electronic mail at sheckler.kelly@epa.gov.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the NNSR portion of Georgia's February 6, 2015 SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all adverse comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

Dated: March 7, 2017.

V. Anne Heard,

Acting Regional Administrator, Region 4.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 86

Notice of Intention To Reconsider the Final Determination of the Mid-Term Evaluation of Greenhouse Gas Emissions Standards for Model Year 2022–2025 Light Duty Vehicles

AGENCY: Environmental Protection Agency (EPA) and Department of Transportation's (DOT) National Highway Traffic Safety Administration (NHTSA).

ACTION: Notice of intent.

SUMMARY: EPA announces its intention to reconsider the Final Determination of the Mid-Term Evaluation of greenhouse gas (GHG) standards for model year (MY) 2022–2025 light-duty vehicles and to coordinate its reconsideration with the parallel process to be undertaken by the DOT's NHTSA regarding Corporate Average Fuel Economy (CAFE) standards for cars and light trucks for the same model years.

DATES: March 22, 2017.

FOR FURTHER INFORMATION CONTACT: William Charmley, Office of Transportation and Air Quality, U.S. Environmental Protection Agency, Fuel Emissions Laboratory/OAR, 2565 Plymouth Road, Ann Arbor, MI 48105, telephone (734) 214–4466. Email: charmley.william@epa.gov and Rebecca Schade, Office of the Chief Counsel, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone: (202) 366–2992.

SUPPLEMENTARY INFORMATION: By this notice, EPA announces its intention to reconsider its Final Determination of the Mid-Term Evaluation of GHG standards for MY 2022–2025 light-duty vehicles. The EPA has inherent authority to reconsider past decisions and to revise, replace or repeal a decision to the extent permitted by law and supported by a reasoned explanation. *FCC v. Fox Television Stations, Inc.*, 556 U.S. 502,

515 (2009). In 2012, EPA committed to continuing to coordinate development of its Clean Air Act (CAA) section 202(a)(1) (42 U.S.C. 7521(a)) emission standards with NHTSA's development of CAFE standards for light-duty vehicles, but did not do so in development and publication of EPA's January 12, 2017 Midterm Evaluation of standards conducted under 40 CFR 86.1818–12(h) of EPA's regulations. EPA now announces it will reconsider that determination in coordination with NHTSA.

The Mid-Term Evaluation was established to review standards set in a 2012 joint rulemaking by the EPA and NHTSA, which set federal GHG emissions and CAFE standards for MY 2017 and beyond for light-duty vehicles. 2017 and Later Model Year Light-Duty Vehicle Greenhouse Gas Emissions and Corporate Average Fuel Economy Standards, Final Rule, 77 FR 62624 (Oct. 15, 2012). These standards, codified for EPA at 40 CFR 86.1818–12, apply to passenger cars, light-duty trucks, and medium-duty passenger vehicles (*i.e.*, sport utility vehicles, cross-over utility vehicles and light trucks), collectively referred to in this notice as light-duty vehicles.

The EPA and NHTSA finalized separate sets of standards under their respective statutory authorities. EPA set GHG standards (including standards for emissions of carbon dioxide (CO₂), nitrous oxide, methane and air conditioning refrigerants) for MY 2017–2025 passenger cars and light-trucks under section 202(a) of the CAA. NHTSA sets national CAFE standards under the Energy Policy and Conservation Act (EPCA), as amended by the Energy Independence and Security Act (EISA) of 2007 (49 U.S.C. 32902). NHTSA set final CAFE standards for MY 2017–2021 light-duty vehicles and issued augural standards for MYs 2022–2025.

The 2012 rulemaking establishing these standards included a regulatory requirement for the EPA to conduct a Mid-Term Evaluation of the GHG standards established for MYs 2022–2025. 77 FR 62625 (October 15, 2012), codified at 40 CFR 86.1818–12(h). In July 2016, EPA, NHTSA, and the California Air Resources Board (CARB) released for public comment a jointly prepared Draft Technical Assessment Report, which examined a range of issues relevant to GHG emissions and CAFE standards for MYs 2022–2025. 81 FR 49217 (July 27, 2016). In November, 2016, EPA issued a proposed determination for the Mid-Term Evaluation. 81 FR 87927 (Dec. 6, 2016). On January 12, 2017, the EPA

Administrator signed the Final Determination of the Mid-Term Evaluation of light-duty vehicle GHG emissions standards for MYs 2022–2025.

Under 40 CFR 86.1818–12(h), no later than April 1, 2018, the EPA Administrator must determine whether the GHG standards previously established under 40 CFR 86.1818–12(c) for MYs 2022–2025 are appropriate under section 202(a) of the CAA, in light of the record then before the Administrator. Given that CO₂ makes up the vast majority of the GHGs that EPA regulates under section 202(a), and given that the technologies available for regulating CO₂ emissions do so by improving fuel economy (which NHTSA regulates under EPCA/EISA), NHTSA's views with regard to what CAFE standards would be maximum feasible for those model years is an appropriate consideration in EPA's determining what GHG standards would be

appropriate under the CAA. See 40 CFR 86.1818–12(h)(1)(vii) (listing as one of the factors EPA should consider in the Mid-Term Evaluation “[t]he impact of the greenhouse gas emission standards on the Corporate Average Fuel Economy standards and a national harmonized program”). However, NHTSA has not yet considered what CAFE standards would be the maximum feasible standards for MYs 2022–2025. Accordingly, EPA has concluded that it is appropriate to reconsider its Final Determination in order to allow additional consultation and coordination with NHTSA in support of a national harmonized program.

For its part, NHTSA will continue to engage with stakeholders as it works to develop a Notice of Proposed Rulemaking to set CAFE standards for MYs 2022–2025. As explained in the 2012 final rule, this proposal will be part of “a de novo rulemaking conducted . . . with fresh inputs and a

fresh consideration and balancing of all relevant factors, based on the best and most current information before the agency at that time.” 77 FR 62652. A final rule for MY 2022 is statutorily required to be issued by NHTSA by April 1, 2020.

In accord with the schedule set forth in EPA's regulations, the EPA intends to make a new Final Determination regarding the appropriateness of the MY 2022–2025 GHG standards no later than April 1, 2018.

Dated: March 3, 2017.

Elaine L. Chao,

Secretary, Department of Transportation.

Dated: March 3, 2017.

E. Scott Pruitt,

Administrator, Environmental Protection Agency.
