

and, depending on the management measures considered, may also affect fisheries that catch chub mackerel incidentally (e.g., the *Illex* squid fishery) and recreational chub mackerel fisheries.

Public Comment

The Council seeks comments on the scope of alternatives to be considered in this amendment, as well as general comments or concerns relating to Council management of Atlantic chub mackerel. In addition to the public comment period provided for in this announcement, the Council will also hold multiple public scoping hearings on this amendment. The dates and locations of these hearings are listed below. The public will have the opportunity to provide additional comments during these hearings. After the scoping process is completed, the Council will begin development of alternatives for chub mackerel management measures, and may prepare an environmental impact statement (EIS) to analyze the impacts of the range of alternatives. If NMFS determines that the management alternatives under consideration are not expected to have significant impacts on the human environment, the Council and NMFS may prepare an environmental assessment (EA) in place of an EIS. This determination will depend on the scope of issues raised and the alternatives developed. Information obtained during the scoping process will be used to develop either an EIS or an EA as appropriate. If an EIS is developed to support this action, the Council will hold future public hearings to receive comment on the draft amendment and on the analysis of its impacts presented in the Draft EIS.
