 collection of information they conduct

or sponsor. In addition, the PRA also  
 requires Federal agencies to provide a  
 60-day notice in the **Federal Register**  
 concerning each proposed collection of  
 information, including each new  
 proposed collection, each proposed  
 extension of existing collection of  
 information, and each reinstatement of  
 previously approved information  
 collection before submitting the  
 collection to OMB for approval. To  
 comply with this requirement, we are  
 publishing this notice of a proposed  
 data collection as described below.

Comments are invited on: (a) Whether  
 the proposed collection of information  
 is necessary for the proper performance

 resources expended by persons to  
 generate, maintain, retain, disclose or

**Proposed Project**

The National Center for Health Statistics (NCHS) Youth Outreach Program—NEW—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

NCHS is authorized to collect data under Section 306 of the Public Health Service Act (42 U.S.C. 242k). NCHS also has a history of reaching out to young people to encourage their interest in Science, Technology, Engineering and

Math (STEM). Examples of past involvement include adopting local schools, speaking at local colleges, conducting a Statistics Day for high school students, and, most recently, conducting the first NCHS Data Detectives Camp for middle school students (OMB Control No. 0920–0729, The NCHS Data Detective Camp).

The success of these programs has inspired NCHS leadership and staff to want to look for new and continuing opportunities to positively impact the lives of young people and expand their interest, understanding of and involvement in the sciences. This might include hosting the Data Detectives Camp annually or bi-annually; hosting Statistics Day annually; creating youth poster sessions for professional conferences (such as the NCHS National

Conference on Health Statistics or the American Statistical Association Conference etc.); hosting a statistical or health sciences etc. fair or other STEM related competitions; organizing a STEM Career Day or similar activity; developing web-based sites or materials with youth focus as well as other programs developed to meet future youth outreach needs, particularly activities that encourage STEM.

Information will be collected using a combination of methodologies appropriate to each program. These may include: Registration forms, letters of recommendation, evaluation forms; mail surveys; focus groups; automated and electronic technology (e.g. email, Web-based surveys); and telephone surveys.

There is no cost to respondents other than their time.
