SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) (authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act, or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, especially those operating small businesses and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Paragraph (b)(3) of the Standard specifies that systems have nameplates

if required, and that these nameplates "be permanently attached to the system (as specified by paragraph (b)(3)(ii)(j)) so as to be readily accessible for inspection" In addition, this paragraph requires that markings on containers and systems covered by paragraphs (c) ("Systems utilizing stationary, nonrefrigerated storage containers"), (f) ("Tank motor vehicles for the transportation of ammonia"), (g) ("Systems mounted on farm vehicles other than for the application of ammonia"), and (h) ("Systems mounted on farm vehicles for the application of ammonia") provide information regarding nine specific characteristics of the containers and systems. Similarly, paragraph (b)(4) of the Standard specifies that refrigerated containers be marked with a nameplate on the outer covering in an accessible place that provides information regarding eight specific characteristics of the container.

The required markings ensure that employers use only properly designed and tested containers and systems to store anhydrous ammonia, thereby preventing accidental release of, and exposure of workers to, this highly toxic and corrosive substance.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements specified in the Anhydrous Ammonia Standard (29 CFR 1910.111). The Agency is requesting that it retain its previous estimate of 345 burden hours associated with this Standard. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.
