

Section 75.336(a)(2) requires the mine operator to evaluate the atmosphere in the sealed area to determine whether sampling through the sampling pipes in seals provides appropriate sampling locations of the sealed area. The mine operator will make an evaluation for each area that has seals.

Section 75.336(c) requires that mine operators immediately notify MSHA after a sample indicates that the oxygen concentration is 10 percent or greater and methane is between 4.5 percent and 17 percent and after taking the required additional sample from the sealed atmosphere with seals of less than 120 psi.

Section 75.336(e) requires a certified person to record each sampling result, including the location of the sampling points and the oxygen and methane concentrations. Also, any hazardous conditions found must be corrected and recorded in accordance with existing Section 75.363.

Section 75.337(c)(1)–(c)(5) requires a certified person to perform several tasks during seal construction and repair and certify that the tasks were done in accordance with the approved ventilation plan. In addition, a mine foreman or equivalent mine official must countersign the record.

Section 75.337(d) requires a senior mine management official to certify that the construction, installation, and materials used were in accordance with the approved ventilation plan.

Section 75.337(e) requires the mine operator to notify MSHA of certain activities concerning the construction of a set of seals. Section 75.337(e)(1) requires the mine operator to notify the District Manager between 2 and 14 days prior to commencement of seal construction. Section 75.337(e)(2) requires the mine operator to notify the District Manager, in writing, within 5 days of completion of a set of seals and provide a copy of the certifications required in Section 75.337(d). Section 75.337(e)(3) requires the mine operator to submit a copy of the quality control test results for seal material properties specified by Section 75.335 within 30 days of completion of such tests.

Section 75.337(g)(3) requires the mine operator to label sampling pipes to indicate the location of the sampling point when the mine operator installs more than one sampling pipe through a seal.

Section 75.338(a) requires mine operators to certify that persons conducting sampling were trained in the use of appropriate sampling equipment, techniques, the location of sampling points, the frequency of sampling, the size and condition of sealed areas, and

the use of continuous monitoring systems, if applicable, before they conduct sampling, and annually thereafter.

Section 75.338(b) requires mine operators to certify that miners constructing or repairing seals, designated certified persons, and senior mine management officials were trained prior to constructing or repairing a seal and annually thereafter.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Sealing of Abandoned Areas. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.

The public may also examine publicly available documents at USDOL—Mine Safety and Health Administration, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Sealing of Abandoned Areas. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs

supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0142.

Affected Public: Business or other for-profit.

Number of Respondents: 242.

Frequency: On occasion.

Number of Responses: 15,800.

Annual Burden Hours: 3,525 hours.

Annual Respondent or Recordkeeper Cost: \$1,068,083.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Sheila McConnell,

Certifying Officer.

BILLING CODE 4510–43–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by the party listed below.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before July 12, 2017.

ADDRESSES: You may submit your comments, identified by “docket number” on the subject line, by any of the following methods:

1. *Electronic Mail:* zzMSHA-comments@dol.gov. Include the docket number of the petition in the subject line of the message.

2. *Facsimile:* 202–693–9441.

3. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect a copy of the petition and

comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT:

Barbara Barron, Office of Standards, Regulations, and Variances at 202-693-9447 (Voice), barron.barbara@dol.gov (Email), or 202-693-9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petition for Modification

Docket Number: M-2017-008-C.

Petitioner: Excel Mining LLC, 4126 State Highway 194 West, Pikeville, Kentucky 41501.

Mine: Excel Mining #4 Mine MSHA I.D. No. 15-19515, located in Pike County, Kentucky.

Regulation Affected: 30 CFR 75.1909(b)(6) (Nonpermissible diesel powered equipment; design and performance requirements).

Modification Request: The petitioner requests a modification of the existing standard to allow use of a six-wheeled Dapco Roadbuilder, model DP-10G, serial number 003, as it was originally designed without front brakes. The petitioner states that:

(1) The Dapco Roadbuilder has a braking system on the four rear wheels that is designed to prevent loss of braking due to a single brake system component failure.

(2) The petitioner will train the grader operator to limit the maximum speed of

the Roadbuilder to 10 miles per hour (MPH) by permanently blocking out any gear that would provide a higher speed than 10 MPH, to use transmission and differential ratios that would limit the maximum speed to 10 MPH, to recognize the appropriate speeds to use on different roadway conditions and different grades/undulations, and to lower the front push blade, grader blade, or digger forks for additional stopping capability in emergency situations.

The petitioner asserts that the design of the Dapco Roadbuilder guarantees no less than the same measure of protection afforded by the existing standard because the machine's braking system is adequate to stop the machine due to the weight distribution over the four rear wheels.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petition for Modification

Docket Number: M-2017-009-C.

Petitioner: Hamilton County Coal, LLC, 18033 County Road 500E, Dahlgren, Illinois 62828-4294.

Mine: Mine No. 1, MSHA I.D. No. 11-03203, located in Hamilton County, Illinois.

Regulation Affected: 30 CFR 75.382 (Mechanical escape facilities).

Modification Requested: The petitioner requests a modification of the existing standard to permit the use of the slope belt conveyor as a mechanical escape facility at Mine No. 1. The petitioner states that:

a. Mine No. 1 extracts coal from the Herrin No. 6 coal seam by both continuous mining and longwall extraction methods. The coal seam is intersected by a vertical shaft with cage hoist facility and by a dual compartment slope that contains a slope car hoist facility in the lower track compartment
