The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136 and 31315.

SUPPLEMENTARY INFORMATION:

Title: Annual Report of Class I Motor Carriers of Passengers.

OMB Control Number: 2126-0031.

Type of Request: Extension of a currently-approved collection.

Respondents: Motor Carriers.

Estimated Number of Respondents: 408.

Estimated Time per Response: 18 minutes.

Expiration Date: October 31, 2017.

Frequency of Response: Annually.

Estimated Total Annual Burden: 122 hours (408 responses × 18 minutes per response/60 = 122.4 rounded to 122).

Background

Section 14123 of title 49 of the United States Code (U.S.C.) requires that the Secretary of Transportation collect annual financial reports from certain for-hire motor carriers of passengers. All Class I for-hire motor carriers of passengers, carriers with gross annual operating revenues of \$5 million or more, are required to complete and file a Motor Carrier Annual Report Form MP-1 for Motor Carriers of Passengers (Form MP-1). See 49 CFR 369.3(a) and 369.4(a). The Form MP-1 annual report will be used to collect financial, operating, equipment and employment data from individual motor carriers of passengers.

The data collected will be available to users in its original form. The data are not used by the Department of Transportation, and, based on a comment to a proposed rule finalized on December 17, 2013 (78 FR 76241), the data are no longer used by trucking associations. Insurance companies, consultants, law firms, academia, trade publications and others may use the data to assess industry growth and its impact on the economy, to identify industry changes that may affect

national transportation, and to monitor company financial stability. The Bureau of Economic Analysis (BEA) of the U.S. Department of Commerce uses the data to inform the national annual input-output and Gross Domestic Product (GDP) estimates. BEA uses the data to prepare estimates of industry output and provide details on inputs to supplement the information on motor carriers of passengers collected by the U.S. Census Bureau.

In response to the March 16, 2017 60-day **Federal Register** notice (82 FR 14103), FMCSA received two comments questioning why the Agency continues to require the annual report filing by Class I passenger motor vehicles, despite FMCSA's statement that the data is not used by the Agency. FMCSA's response to the comments is 49 U.S.C. 14123 requires that the Agency collect such annual financial reports.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for FMCSA to perform its functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information.

Issued under the authority delegated in 49 CFR 1.87 on: July 20, 2017.

G. Kelly Regal,

Associate Administrator for Office of Research and Information Technology.

II. Background

On May 26, 2017, FMCSA published a notice of receipt of Federal diabetes exemption applications from 49 individuals and requested comments from the public (82 FR 24438). The public comment period closed on June 26, 2017, and no comments were received.

FMCSA has evaluated the eligibility of the 49 applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current requirement for diabetes in 1970 because several risk studies indicated that drivers with diabetes had a higher rate of crash involvement than the general population. The diabetes rule provides that “A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring

insulin for control” (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency’s July 2000 study entitled “A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century.” The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible. The September 3, 2003 (68 FR 52441), **Federal Register** notice in conjunction with the November 8, 2005 (70 FR 67777), **Federal Register** notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These 49 applicants have had ITDM over a range of 1 to 33 years. These applicants report no severe hypoglycemic reactions resulting in loss of consciousness or seizure, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning symptoms, in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the past five years. In each case, an endocrinologist verified that the driver has demonstrated a willingness to properly monitor and manage his/her diabetes mellitus, received education related to diabetes management, and is on a stable insulin regimen. These drivers report no other disqualifying conditions, including diabetes-related complications. Each meets the vision requirement at 49 CFR 391.41(b)(10).

The qualifications and medical condition of each applicant were stated and discussed in detail in the May 26, 2017, **Federal Register** notice and they will not be repeated in this notice.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

IV. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the diabetes requirement in 49 CFR 391.41(b)(3) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. The exemption allows the applicants to operate CMVs in interstate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered medical reports about the applicants’ ITDM and vision, and reviewed the treating endocrinologists’ medical opinion related to the ability of

the driver to safely operate a CMV while using insulin.

Consequently, FMCSA finds that in each case exempting these applicants from the diabetes requirement in 49 CFR 391.41(b)(3) is likely to achieve a level of safety equal to that existing without the exemption.

V. Conditions and Requirements

The terms and conditions of the exemption will be provided to the applicants in the exemption document and they include the following: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within two business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual provide a copy of the ophthalmologist’s or optometrist’s report to the medical examiner at the time of the annual medical examination; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver’s qualification file, or keep a copy in his/her driver’s qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

VI. Conclusion

Based upon its evaluation of the 49 exemption applications, FMCSA exempts the following drivers from the diabetes requirement in 49 CFR 391.41(b)(3):

Craig L. Ambrose (GA)
Manuel R. Arciniega (NM)
Timothy D. Beardain (MS)
Tyler A. Benjamin (AL)

In accordance with 49 U.S.C. 31136(e) and 31315 each exemption is valid for two years unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315. If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the Federal Motor Carrier Safety Regulations 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption." The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 127 individuals listed in this notice have recently become eligible for a renewed exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. The drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

II. Exemption Decision

This notice addresses 127 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. These 127 drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. Therefore, FMCSA has decided to extend each exemption for a
