SUPPLEMENTARY INFORMATION: The Commission's proposal relating to the Emergency Regulation of Levels on Rainy and Namakan Lakes are centered on five general themes:

Changes to existing Rule Curves: Alternative C for the rule curves for Rainy and Namakan lakes, which includes a rule curve for high flood risk years for Rainy Lake, should be adopted.

An expanded role for the Water Levels Committee (WLC) of the International Rainy-Lake of the Woods Watershed Board (IRLWWB): The WLC should be empowered to target specific levels outside of the middle portion of the rule curve for each lake. New operational guidelines are needed for the WLC, and further guidance, in the form of a refined directive for the IRLWWB and the WLC, is needed.

Adaptive Management: The Commission will work with the

¹⁵ 17 CFR 200.30-3(a)(12).

IRLWWB to determine how best to implement an adaptive management strategy in the medium and long term planning and activities of both the IRLWWB and the Commission in the basin.

Stakeholder Concerns: The views of stakeholders, as heard through the Commission and Study Board engagement and hearings, will be communicated to governments.

Engagement with Indigenous Communities: The Commission endorses the Study Board's recommendations regarding improving engagement and collaboration with Tribes, First Nations, and Métis communities.

Public input is essential to the Commission's rendering of a final decision to proceed with the proposed changes to the management of emergency levels and flows of the Rainy and Namakan Lakes, and to the Commission's perspective on changes to the operations and guidance provided to the Water Levels Committee, engagement with Tribes, First Nations, and Métis, and adaptive management.

The International Joint Commission was established under the Boundary Waters Treaty of 1909 to help the United States and Canada prevent and resolve disputes over the use of the waters the two countries share. Its responsibilities include investigating and reporting on issues of concern when asked by the governments of the two countries.

Under the Rainy Lake Convention, the IJC determines when emergency conditions exist in the Rainy Lake watershed, by reason of high or low water, and adopts measures of control with respect to the dams at Kettle Falls and International Falls-Fort Frances.
